Thank You for Purchasing a Rapid Fryer!

Warranty Registration

To ensure that you receive the highest quality service & support;

- 1) Simply fill out the online warranty registration form anytime at www.perfectfry.com and automatically receive your warranty activation code.

OR

- 2) Fill out the enclosed warranty registration form and mail or fax it to Perfect Fry Company then phone Toll Free 603-225-6684 (Monday-Friday 8:00-5:00 EST) to receive your warranty activation code.

Fryer Activation

SEE THIS LCD

THANK YOU FOR
PURCHASING A PERFECT
FRYER SN# XXXXX

CALL OR GO ONLINE
ENTER WARRANTY CODE
AND PRESS START:
▶*****

DO THIS

- 1) Enter your warranty activation code
- 2) Press **Start**
- 3) Your Rapid fryer is now permanently activated

GET THIS LCD

HEATING
 **70°F**

For temporary access, enter 123456 then press **Start.**
Temporary access is valid for 90 days.

Now that you have registered and activated your fryer;

- Take advantage of our food program partners whose rebates help offset the cost of your newly purchased Rapid Fryer. Food program rebates will be sent to you, however if you wish to view our current partners immediately, please visit www.perfectfry.com.
- Take comfort in knowing that your Rapid Fryer is backed by an industry leading 1..2..3 warranty (see page 49 for further details).
- Take comfort in knowing that the management and staff at Perfect Fry Company are dedicated to ensure that you, the owner and operator of a Rapid Fryer, receive a top quality product that is thoroughly inspected and tested prior to shipment.
- Take comfort in knowing that our local distribution network is committed to supplying your service and warranty needs. Each distributor has dedicated service staff that is able to answer any questions you may have regarding the operation of your Rapid Fryer. We also have an online knowledgebase available 24/7/365 at perfectfry.com with many great tips and solutions.

OWNERS RESPONSIBILITIES

It is the owner's responsibility to:

- Insure the RAPID FRYER is properly maintained.
- Allow only properly trained personnel to operate, clean and maintain a RAPID FRYER.
- Contact local authorities having jurisdiction to insure that the installation conforms to all local fire, building and health regulations.
- Schedule and maintain documentation that the appropriate inspection and maintenance of the PFS Automatic Extinguisher has been completed.
- Insure that the model ready for installation matches the supply voltage.
- Insure that the main power supply is disconnected before the RAPID FRYER is serviced.
- Insure that all safety devices are intact.
- Insure that a proper surface is provided for the RAPID FRYER to sit on.
- Insure that proper clearances are kept.
- Operate and store the RAPID FRYER above 0°C (32°F).
- Return the RAPID FRYER for recycling when it reaches end of life.

REGULATIONS & RECYCLING

Installation of your RAPID FRYER must conform to all local fire and health regulations and building codes. The installation use and maintenance is to be in accordance with the Standard for Ventilation Control and Fire Protection of Commercial Cooking Operations, NFPA 96 - 2004.

The table below describes the standards that your RAPID FRYER has been tested to and the corresponding listing marks depending on your region.

| STANDARD | DESCRIPTION | LISTING MARK |
|----------------------------------|--|---|
| UL 197 UL 197 SB (UL 710B) | Commercial electric cooking appliances. Commercial electric cooking appliances with recirculating systems. UL 197 & UL 197 SB supplement also reference the following standards which your PERFECT FRYER meets applicable parts thereof: <ul style="list-style-type: none"> • UL 1046: Grease Filters for Exhaust Ducts. • UL 300: Fire Testing of Fire Extinguishing Systems for Protection of Restaurant Cooking Areas. • NFPA 17A: Wet Chemical Extinguishing Systems. • NFPA 96: Standard for Ventilation Control and Fire Protection of Commercial Cooking Operations. • EPA 202: Determination of Condensable Particulate Emissions for Stationary Sources. |  |
| CSA 22.2 No. 109-M1981 | Commercial Cooking Appliances forming part of Canadian Electrical Code, Part 2 Safety Standards for Electrical Equipment. | |
| NSF 4 | Commercial Cooking, Rethermalization, and Powered Hot Food Holding and Transport Equipment. |   |
| EN60335-1 | Safety of Household and Similar Electrical Appliances Part 1. General Requirements Amendment 8913 - October 1995 Amendment 9475 - May 1997 |  |
| EN60335-2-37 | Safety of Household and Similar Electrical Appliances Part 2. Commercial Electric Deep Fat Fryers |  |
| EN61000-6-1 EN61000-6-3 | Electromagnetic Compatibility (EMC) – Emissions & Immunity for Light Industrial Environments | |

The table below describes the recycling procedures for your PERFECT FRYER.

| | | |
|---|---|---|
| WEEE (Waste Electrical & Electronic Equipment) 2002/96/EC | When your PERFECT FRYER has reached end of life, please deliver the fryer to your local distributor. They will prepare and deliver the fryer for recycling to the WEEE collection system in your country. Most of the fryer's materials can be recycled. DO NOT DISPOSE OF THE FRYER IN MUNICIPAL WASTE! |  |
|---|---|---|

SAFETY FIRST

LIFTING & MOVING:

- Your RAPID FRYER's gross shipping weight is 125 lb. (57 kg). Net weight = 110 lb. (50 kg). **DO NOT LIFT THE FRYER BY YOURSELF. ALWAYS REMOVE OIL BEFORE MOVING FRYER.**

DEEP FRYING:

- Cooking oil is very hot (350°F or 177°C). Hot oil can cause severe burns. **DO NOT TOUCH THE COOKING OIL UNLESS YOU ARE SURE IT HAS COOLED.**

HEATER MODULE:

- DO NOT DROP
- DO NOT IMMERSE IN WATER

CLEANING:

- **DO NOT OPEN DRAWER LID OR FRONT PANEL WHEN PRODUCT IS LOADING**
- Before cleaning fryer or removing oil, let fryer cool to 122°F (50°C). **DO NOT TOUCH HEATER MODULE, VAT OR OIL UNLESS YOU ARE SURE IT HAS COOLED.**
- Lubricate rails of shovel and bottom of drawer using an approved food grade grease or silicone lubricant

COOKING OIL MAINTENANCE:

- For sanitation and safety, we recommend that the cooking oil is replaced once a week, more often for higher volume usage. Use a commercial grade deep-fryer formulated cooking oil. OLD OIL HAS A REDUCED FLASHPOINT. OLD OIL AND OVER-WET FOOD ARE PRONE TO SURGE BOILING.

SERVICING:

- DISCONNECT THE POWER SOURCE BEFORE SERVICING THE FRYER. There is no need to unplug your RAPID FRYER for normal cleaning or maintenance.

STORAGE:

- Do not store your RAPID FRYER below 0°C (32°F)

INSTALLATION

Electrical Power Supply (North American Models)

- Your RAPID FRYER must be connected to a dedicated electrical circuit that meets your fryer's requirements (see table below).

⚠ CAUTION Improper Installation may damage the fryer and void your warranty

- If your RAPID FRYER's plug does not fit your wall outlet receptacle, have an electrician install the appropriate NEMA receptacle within 4 feet of the fryer.
- See the manufacturer's label on your RAPID FRYER for the electrical Model No. PFAXXXX, then check off your Model Number.
- Your RAPID FRYER is equipped with a heat lamp outlet for an optional PFW heat lamp rated at 500W (240V/2A).

Electrical Specifications (North American Models)

| PERFECT FRY MODEL | VOLTS | AMPS | CIRCUIT AMPS | WATTS | NEMA NUMBER | NEMA RECEPTACLE |
|--|-------|------------------------------|-----------------|--------------------------------|----------------|---|
| ↓ Put a check mark <input checked="" type="checkbox"/> in the box beside the Model Number of your RAPID FRYER. | | | | | | |
| <input type="checkbox"/> PFA7200 | 240 | 32.0 Fryer 30 Acc. 2 | Minimum 40 | 7600 Fryer 7200 Acc. 400 | | For use on an individual branch circuit rated 40A minimum. For supply connectors, use minimum no. 8 AWG wire (40A rated). This fryer must be properly connected to a grounded, dedicated 240 VAC single phase circuit according to local installation standards and codes. |
| <input type="checkbox"/> PFA5700 | 240 | 26.0 Fryer 24 Acc. 2 | Minimum 30 | 6100 Fryer 5700 Acc. 400 | | For use on an individual branch circuit rated 40A minimum. For supply connectors, use minimum no. 8 AWG wire (40A rated). This fryer must be properly connected to a grounded, dedicated 240 VAC single phase circuit according to local installation standards and codes. |
| <input type="checkbox"/> PFA5708 | 208 | 28.5 Fryer 27 Acc. 1.5 | Minimum 30 | 6000 Fryer 5700 Acc. 300 | | For use on an individual branch circuit rated 40A minimum. For supply connectors, use minimum no. 8 AWG wire (40A rated). This fryer must be properly connected to a grounded, dedicated 208 VAC single phase circuit according to local installation standards and codes. |
| <input type="checkbox"/> PFA3750 | 240 | 18.0 Fryer 16 Acc. 2 | 20 | 4150 Fryer 3750 Acc. 400 | | For use on an individual branch circuit rated 30A minimum. This fryer must be properly connected to a grounded, dedicated 240 VAC single phase circuit according to local installation standards and codes. |
| All models are single phase; 50/60 hertz. | | | | | | |

Electrical Power Supply (International Models)

- Your RAPID FRYER must be connected to a dedicated electrical circuit that meets your fryer's requirements (see table below).

⚠ CAUTION Improper Installation may damage the fryer and void your warranty

- If your RAPID FRYER's plug does not fit your wall outlet receptacle, have an electrician install the appropriate receptacle within 1.25 meters of the fryer.
- See the manufacturer's label on your RAPID FRYER for the electrical Model No. PFAXXXX, then check off your Model Number.
- Heat lamp requires a standard 240 VAC receptacle located within 1.5 meters of the fryer.

Electrical Specifications (International Models)

| <input type="checkbox"/> PFA3751 | 240 | 16.0 | 20 | 3750 |

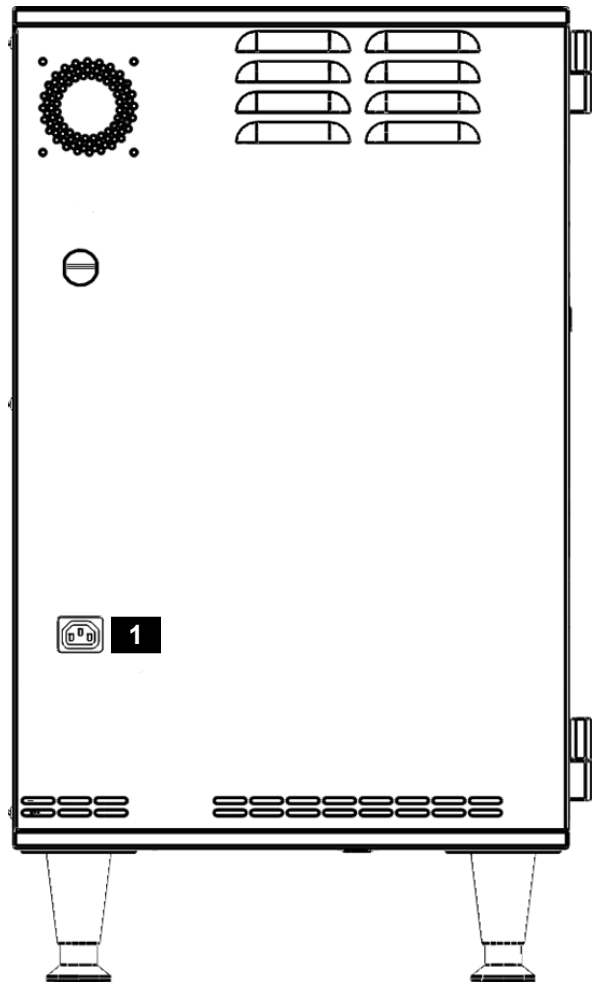

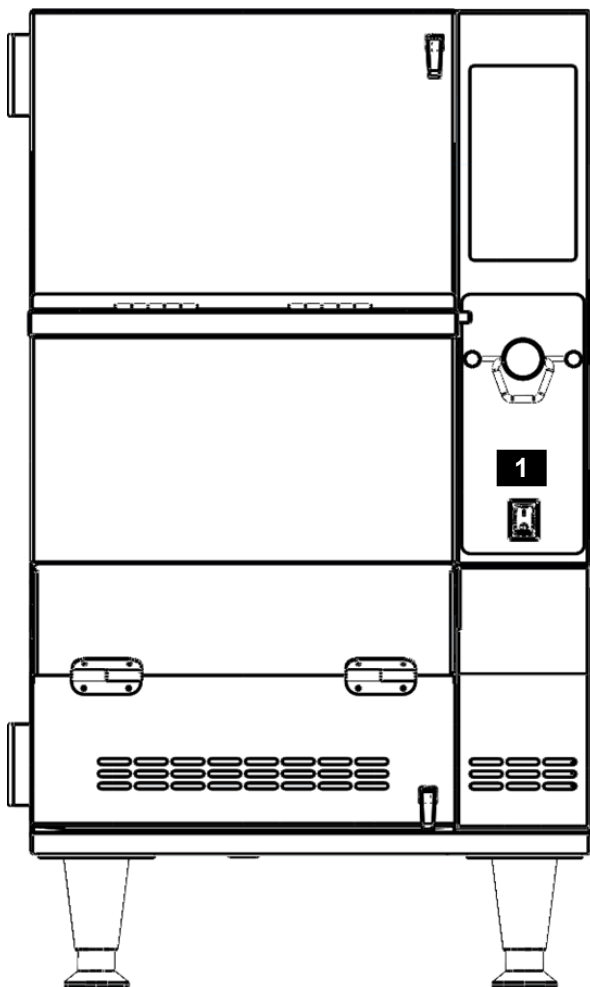

INSTALLATION (Continued)

Accessory Outlets (North American Models)

Your RAPID FRYER is equipped with 1 heat lamp outlet (North American models only) that can accept a Perfect Fry approved heat lamp only. The front heat lamp for the PFA is rated at 500W (240V/2A).

⚠ CAUTION Disconnect the fryer from the electrical supply before attempting the installation of any Perfect Fry heat lamp. The heat lamp is for use only on Perfect Fry equipment equipped and marked with a heat lamp outlet.

A front panel mount switch controls the power to the heat lamp.

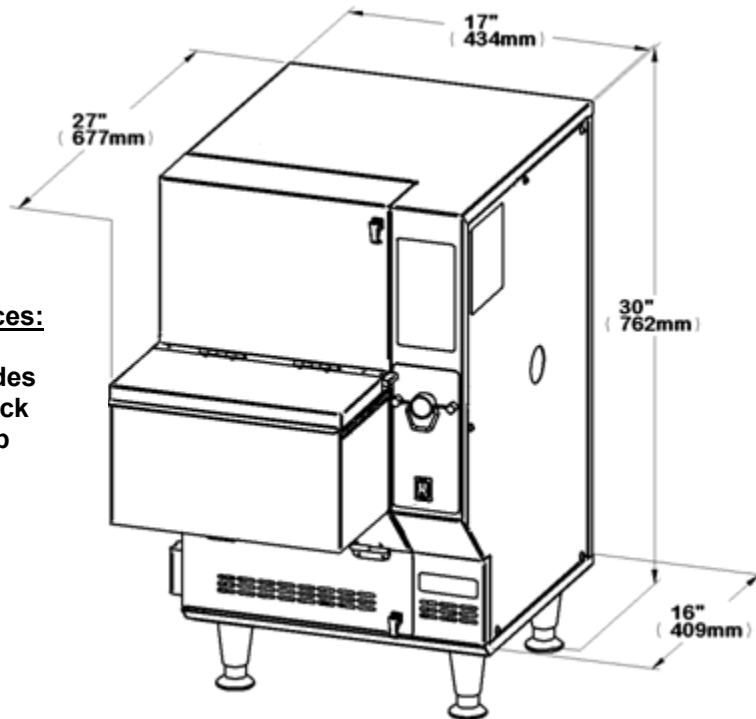

INSTALLATION (Continued)

Prepare Counter-top Area

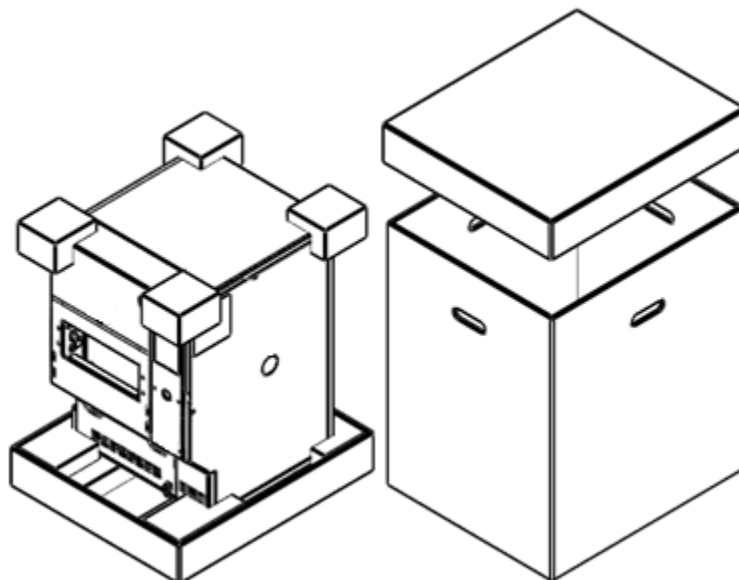

Clearances:

1" on sides
2" on back
0" on top

Unpack

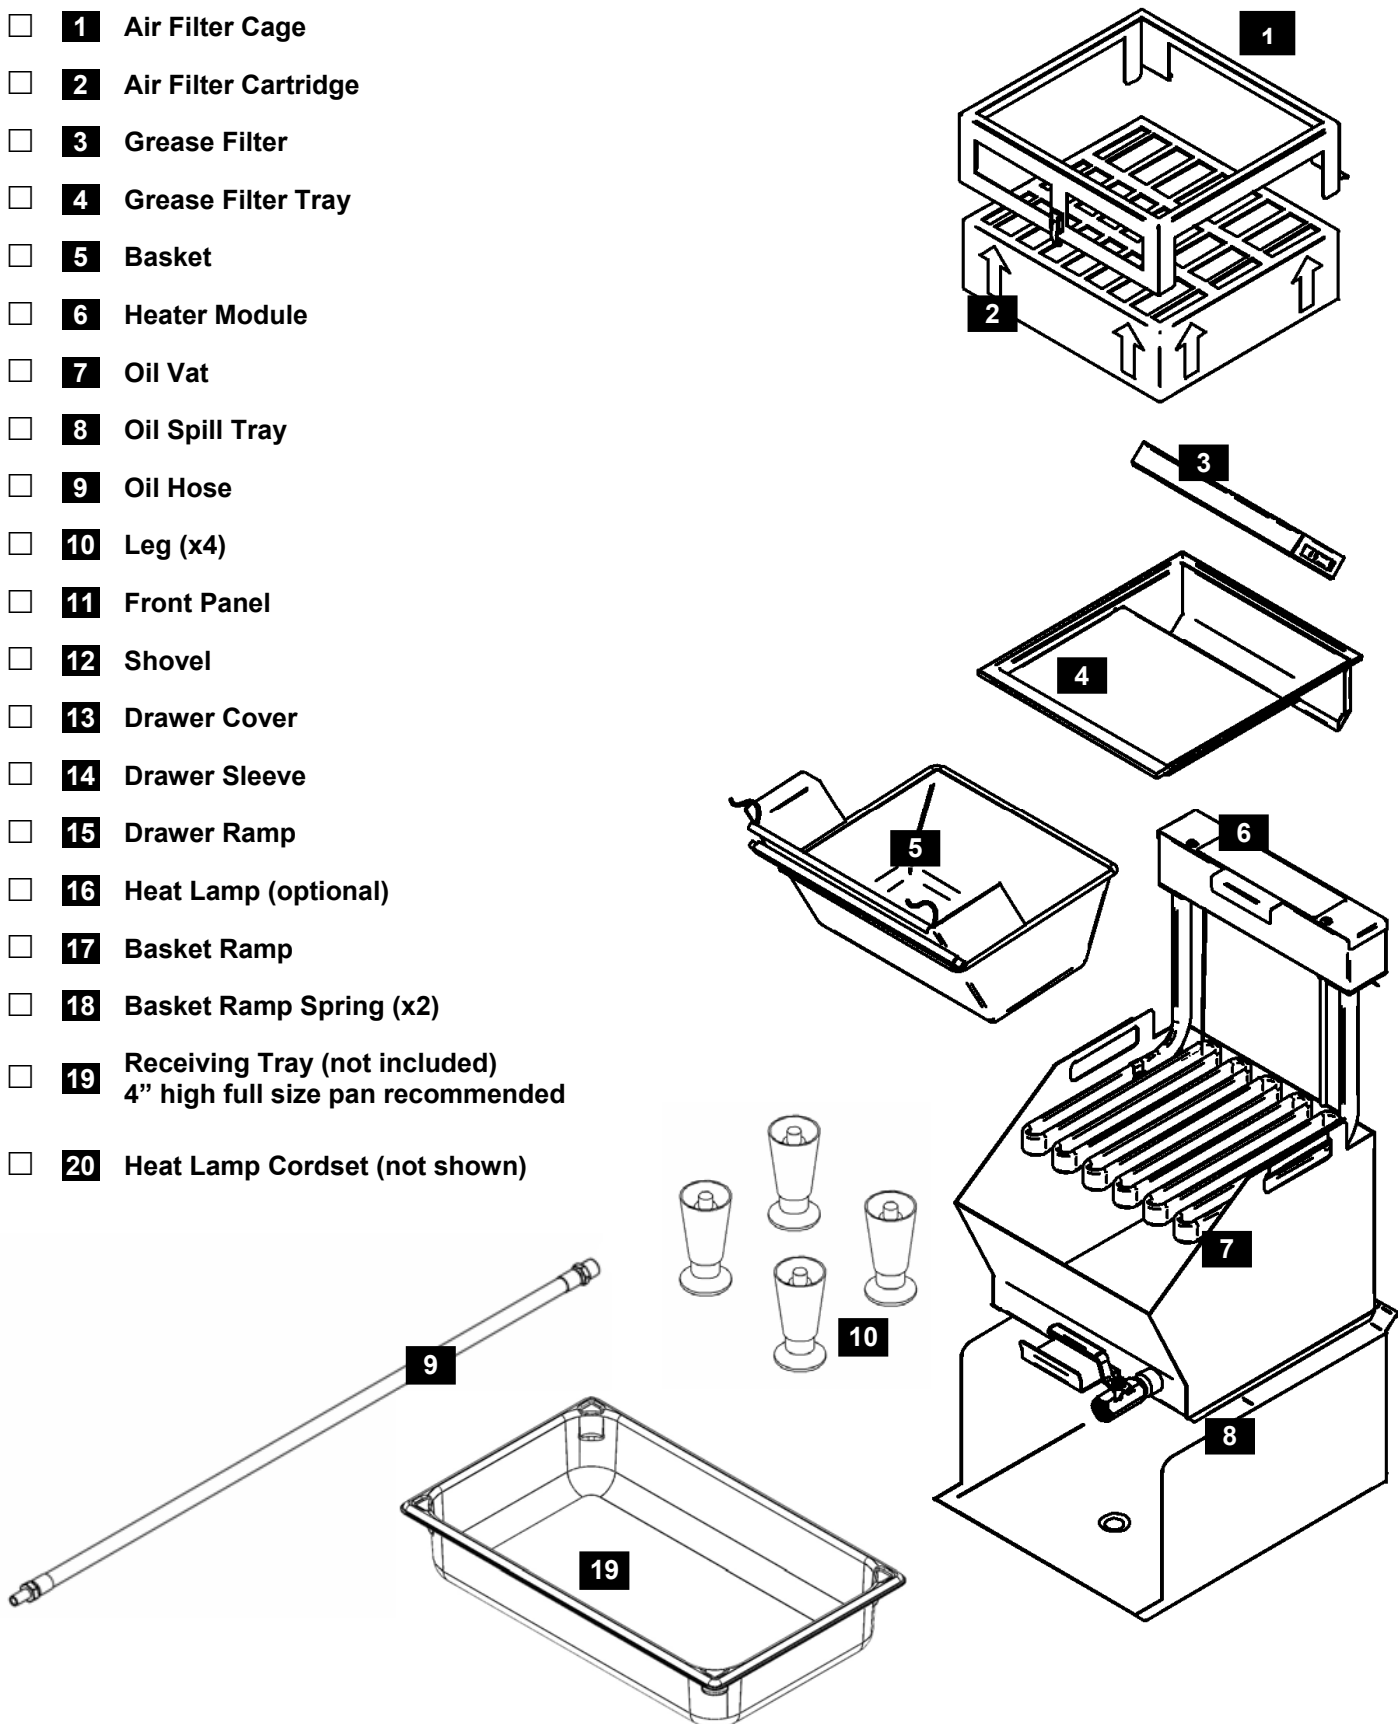

- 1) Cut straps on shipping box
- 2) Remove box top and body
- 3) Remove outer plastic wrapping and keep box along with foam corners and sides

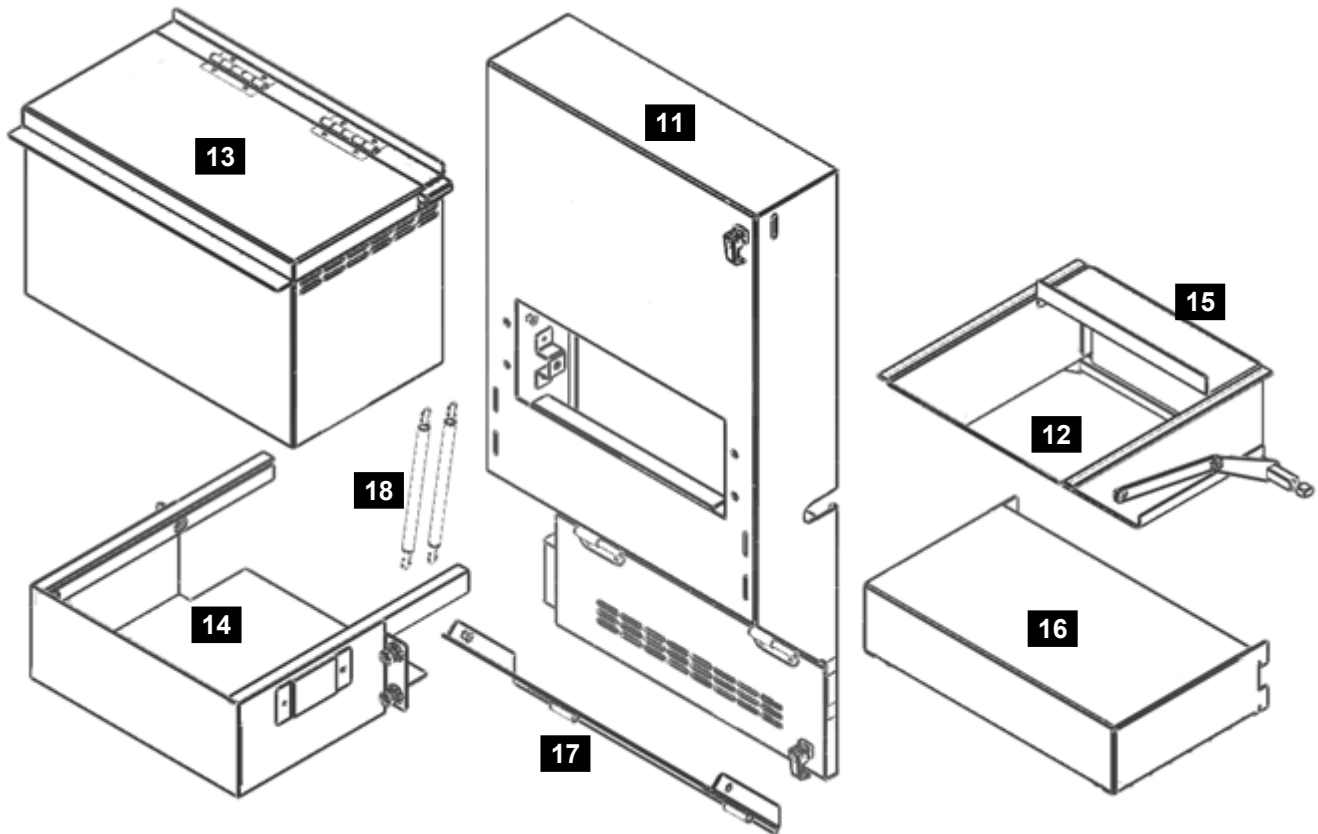

4) Remove all foam stuffing and parts

5) Put check mark ☒ in box once the part is removed

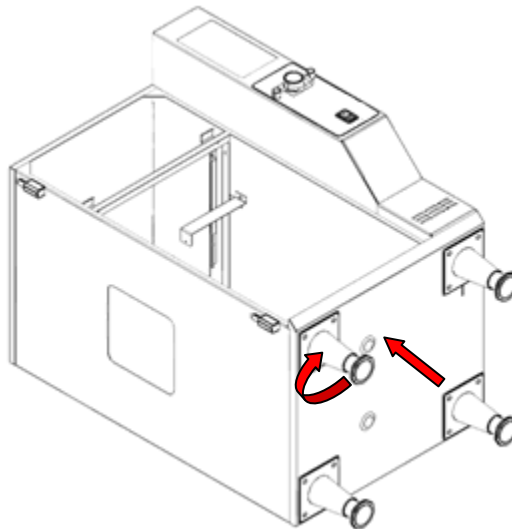

- ☐ **1** Air Filter Cage
- ☐ **2** Air Filter Cartridge
- ☐ **3** Grease Filter
- ☐ **4** Grease Filter Tray
- ☐ **5** Basket
- ☐ **6** Heater Module
- ☐ **7** Oil Vat
- ☐ **8** Oil Spill Tray
- ☐ **9** Oil Hose
- ☐ **10** Leg (x4)
- ☐ **11** Front Panel
- ☐ **12** Shovel
- ☐ **13** Drawer Cover
- ☐ **14** Drawer Sleeve
- ☐ **15** Drawer Ramp
- ☐ **16** Heat Lamp (optional)
- ☐ **17** Basket Ramp
- ☐ **18** Basket Ramp Spring (x2)
- ☐ **19** Receiving Tray (not included)
4" high full size pan recommended
- ☐ **20** Heat Lamp Cordset (not shown)

- 6) Tilt RAPID FRYER to one side and install 2 adjustable legs, repeat process for other side

CAUTION Do not operate your RAPID FRYER without legs.

- 7) Lift your RAPID FRYER onto countertop and adjust legs as necessary

CAUTION Your RAPID FRYER weighs 110 lb. (50 kg). Lift it carefully with your legs or with the help of another person and place it in its final location.

- 8) Ensure that blow-off caps on fire extinguisher nozzles are kept in place
9) Go to ASSEMBLY section (next page)

ASSEMBLY

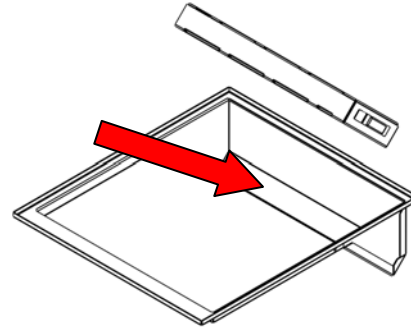

1) Clean parts and inside of cabinet (all except air filter cartridge)

- a) Wash in warm soapy water
- b) Rinse with hot water
- c) Rinse with vinegar solution (1 part vinegar to 2 parts water)

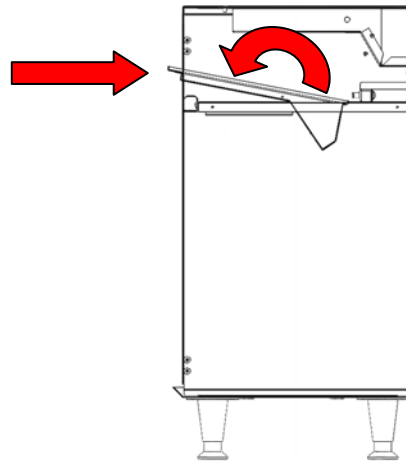

⚠ CAUTION The heater box and heat lamp must NOT be immersed in water or other liquid.

2) Install grease filter into grease filter tray

Note: magnet should be on right side

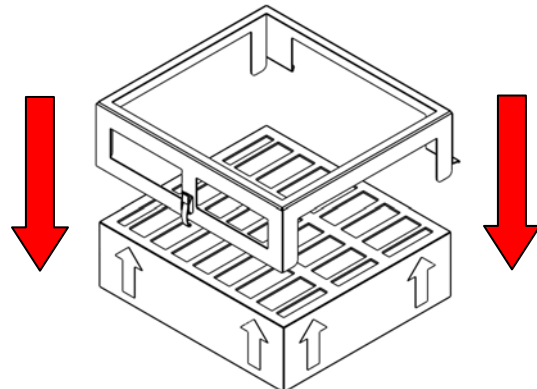

3) Install grease filter/grease filter tray into filter compartment by sliding along rails and towards back

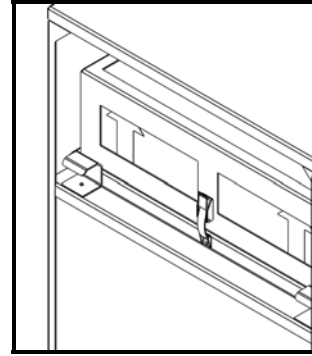

4) Fit air filter cage over air filter cartridge

Note: Make sure arrows are pointing up

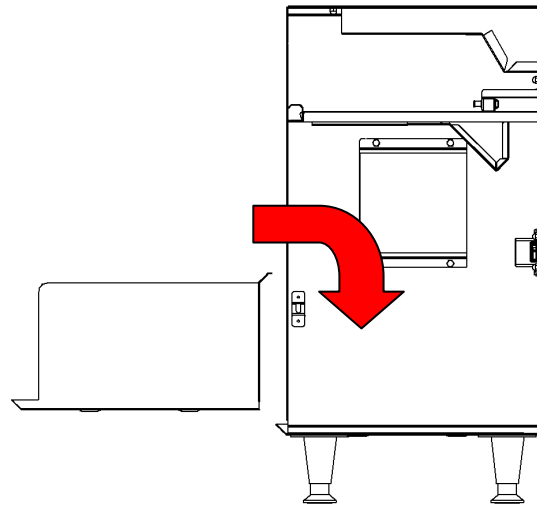

ASSEMBLY (Continued)

- 5) Slide air filter cartridge firmly back into filter compartment and fasten down with latch.

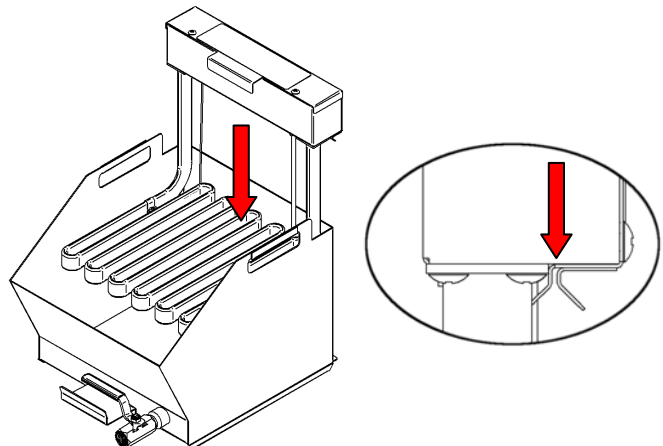

- 6) Install spill tray into bottom cooking compartment

Note: Indents on bottom of spill tray should fit into indents on bottom of cabinet

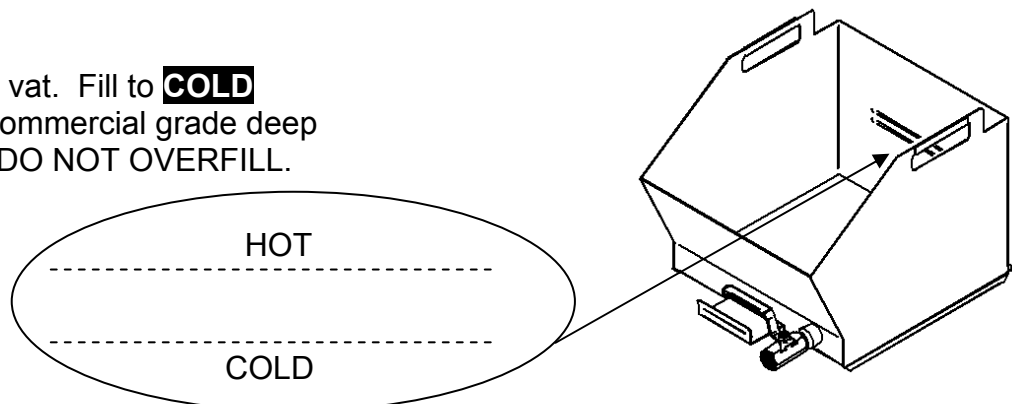

- 7) Set heater module onto vat

Note: “Λ” grooves on bottom of heater module should fit onto back of vat

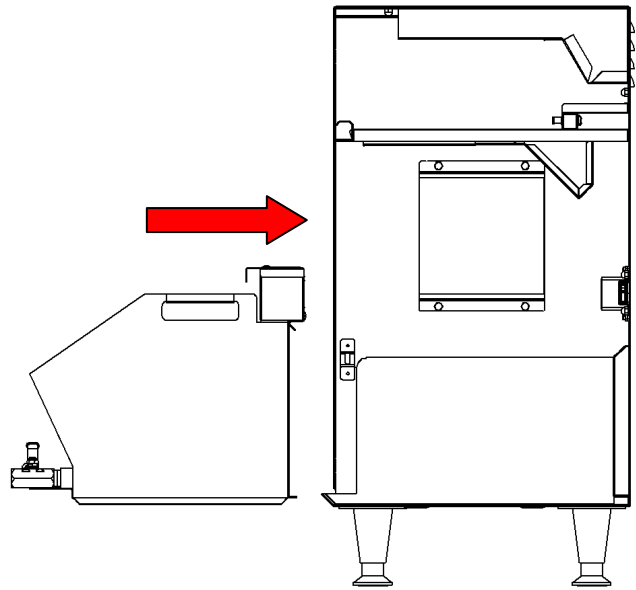

- 8) Pour frying oil into vat. Fill to **COLD** level mark. Use commercial grade deep fryer cooking oil. DO NOT OVERFILL.

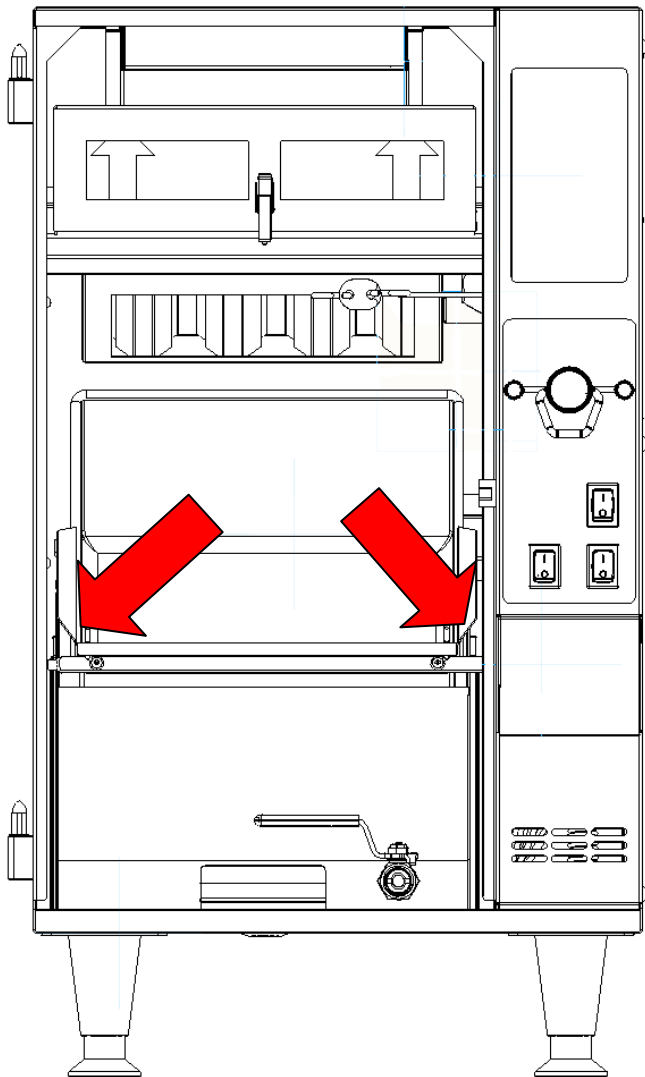

ASSEMBLY (Continued)

- 9) Slide heater module/vat into cooking compartment and push in all the way. Ensure electrical connection is complete with firm push on heater module.

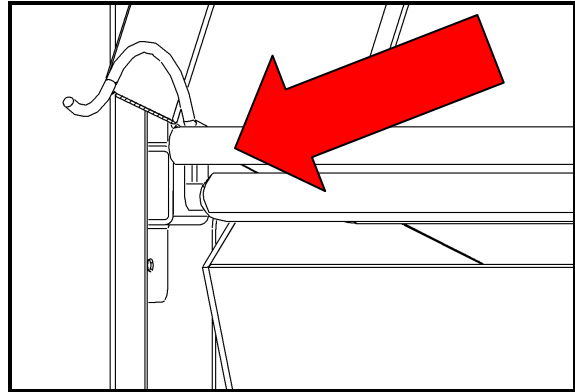

- 10) Install basket

- a) Tilt basket bottom forward and maneuver rod past cabinet flanges

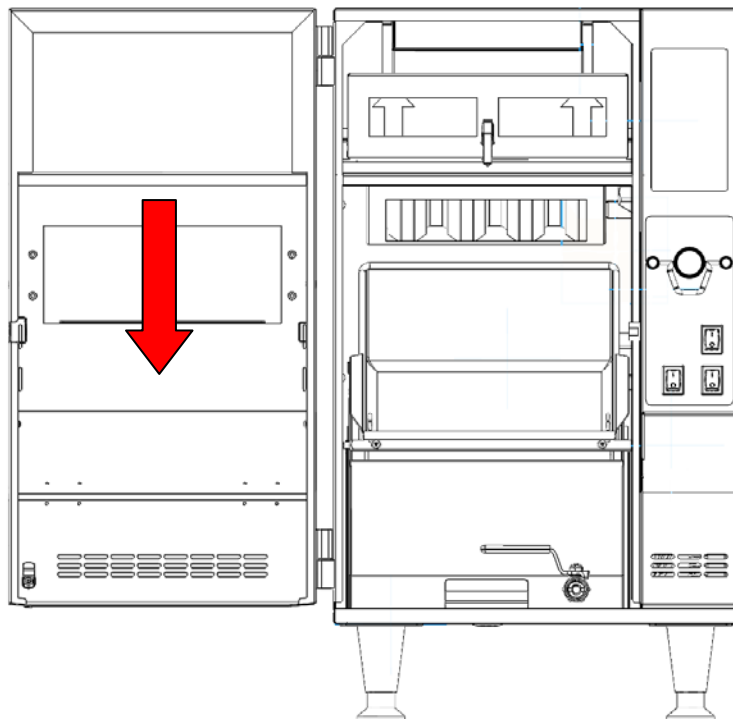

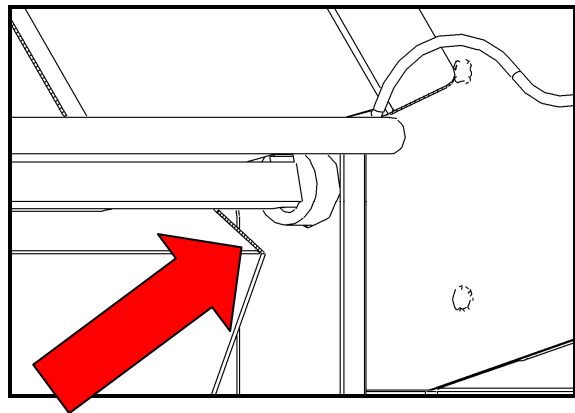

ASSEMBLY (Continued)

b) Install rod into pivot slot – left side

c) Install rod into motor coupler – right side

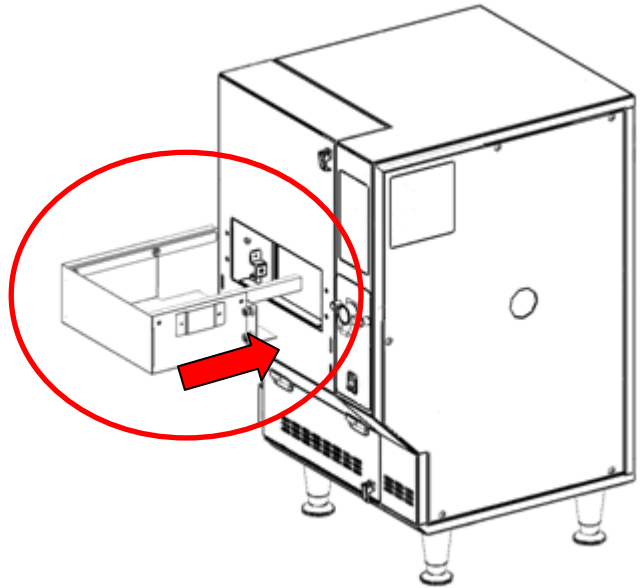

11) Install front panel using lift off hinges and close front panel. Turn latches $\frac{1}{4}$ turn clockwise and press down.

ASSEMBLY (Continued)

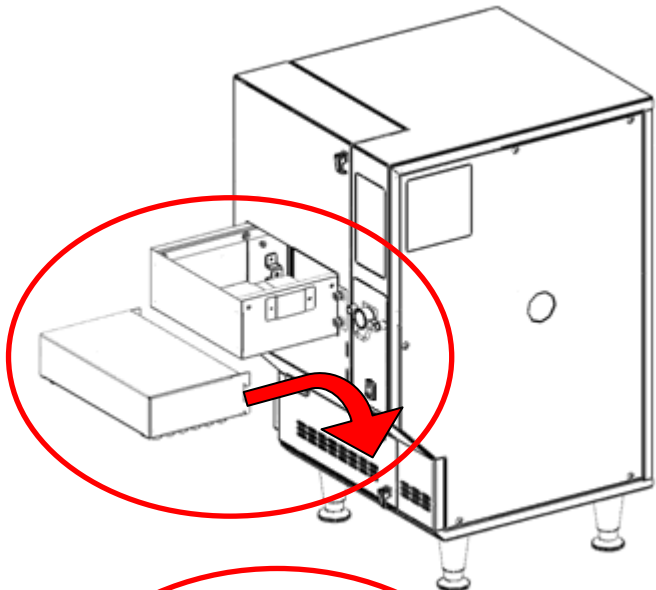

- 12) Install drawer sleeve using 4 captive screws. Tighten securely.

Note: Bottom of drawer sleeve should sit tight on front panel.

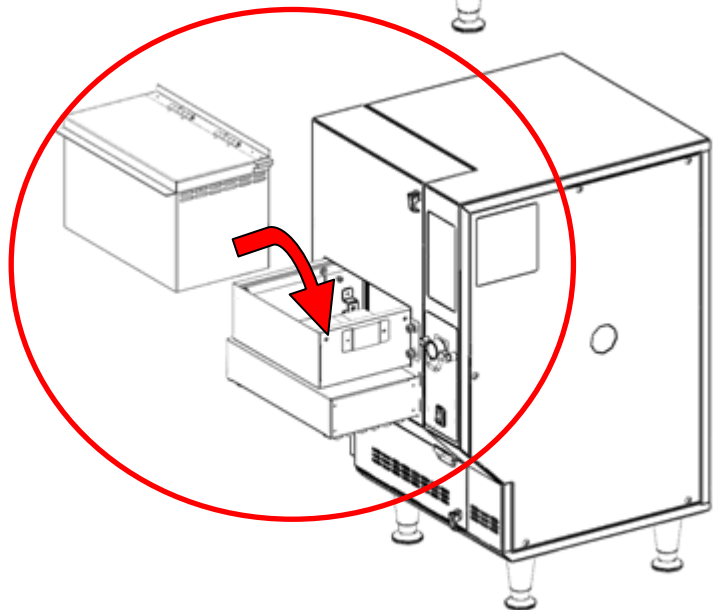

- 13) Install heat lamp. Connect cordset to connectors on left side of heat lamp and back of fryer (accessory outlet 1). Refer to Accessories on page 7 for more information. To change the 100W halogen bulb, remove cover and replace bulb with a similarly rated (correct voltage) bulb. Be sure not to touch the bulb with bare hands.

Note: Tabs on back of heat lamp should fit into slots on front panel

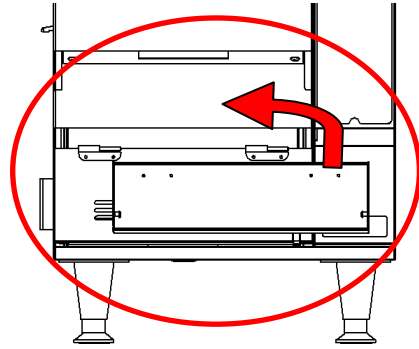

- 14) Install drawer cover

Note: Tabs on inside of cover should fit into slots on sides of drawer sleeve

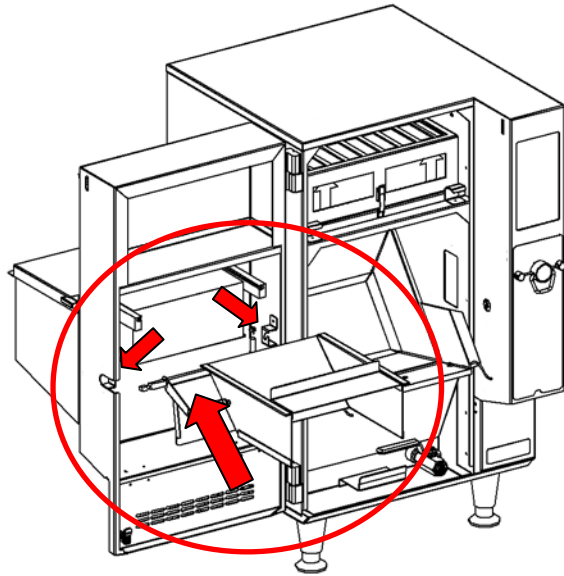

ASSEMBLY (Continued)

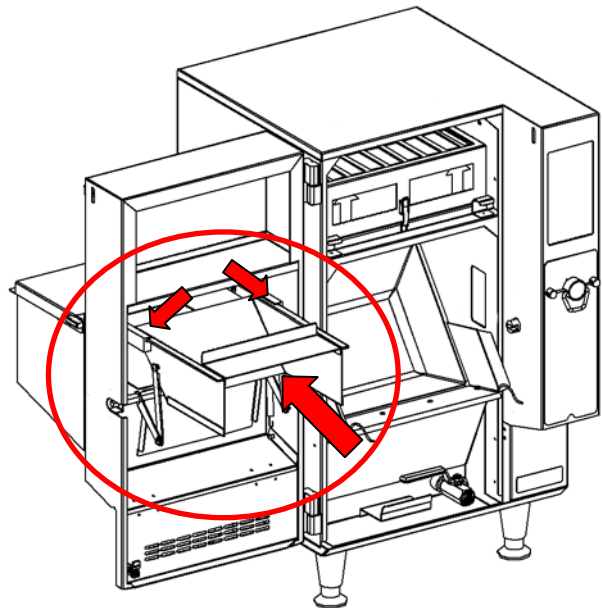

- 15) Install basket ramp using hinges. Install basket ramp springs onto mounts provided. For proper airflow and sanitation, basket ramp must always be installed.

- 16) Install drawer ramp into hole on right side and slots on left side of inside of front panel.

- 17) Install drawer shovel into guides and push shovel in completely.

- 18) Close and lock the front panel by turning latches $\frac{1}{4}$ turn clockwise and pressing down.

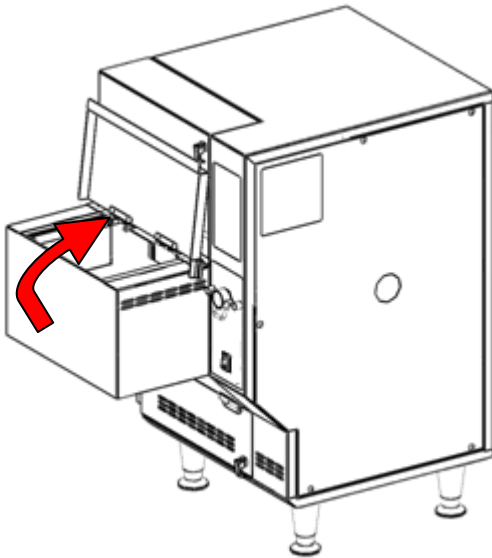

Plug in fryer and press . The fryer will now begin heating. In a few minutes, you will be ready to start cooking!

COOKING

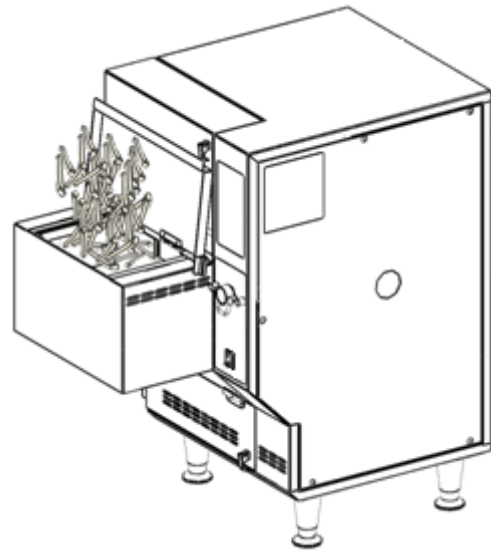

Press **Preset** to toggle between modes

| Manual Mode | Preset Mode | Preset Locked Mode | RapidFry™ Mode |
|--------------------|------------------------|--------------------------------|----------------|
| Load Food | Load Food | Load Food | Load Food |
| Select Time | Press Preset | Select Preset # | |
| Press Start | Select Preset # | <i>Manual Mode shown below</i> | |

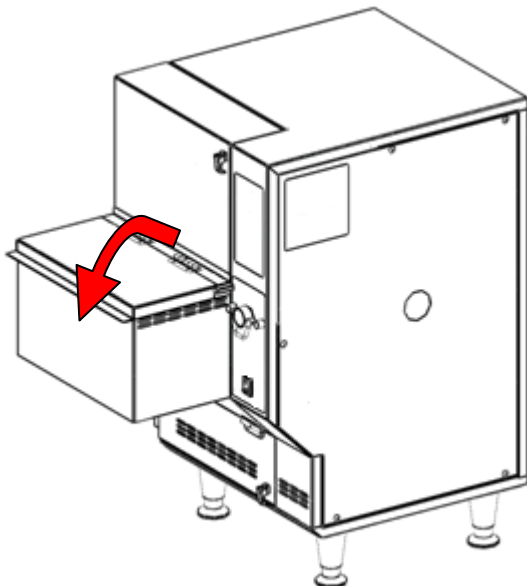

1. Open Drawer Lid

2. Fill Drawer

3. Close Drawer Lid

4. Enter Time/Press Start

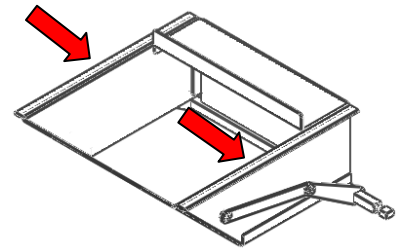

CLEANING

Daily Maintenance

CAUTION Do not unplug the fryer and always make sure the fryer is turned off

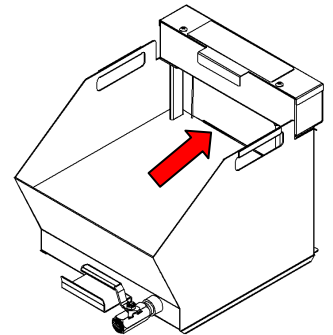

CAUTION Do not touch heater module, oil vat or oil unless you are sure it has cooled

- 1) Wipe basket with paper towel to remove crumbs and food particles
- 2) Wipe crumbs, oil and any other food matter from inside of drawer using a paper towel
- 3) Clean outside of fryer with a good stainless steel cleaner and wipe dry
- 4) Lubricate rails of shovel and bottom of drawer using an approved food grade grease or silicone lubricant

CAUTION Do not clean the outside or any other stainless steel part using abrasive cleaners

- 5) Check oil level on the back of vat to make sure it is up to cold line (at room temperature). If not, add oil as necessary. Replace the cooking oil once a week or more often if necessary. Use a **COMMERCIAL GRADE DEEP FRY COOKING OIL**.

Weekly Maintenance

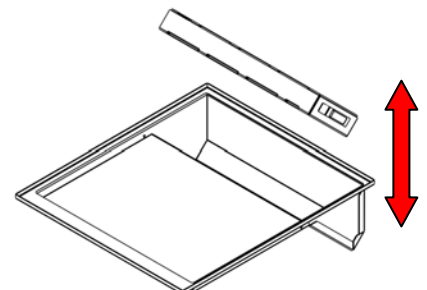

CAUTION Do not unplug the fryer and always make sure the fryer is turned off

CAUTION Do not touch heater module, oil vat or oil unless you are sure it has cooled

- 1) Open front panel by lifting and turning latches. Remove drawer parts and wash in soap and hot water. Rinse well in hot water and dry.
- 2) Remove air filter cartridge and set aside (for replacement, see page 20).

CAUTION Do not wash air filter cartridge

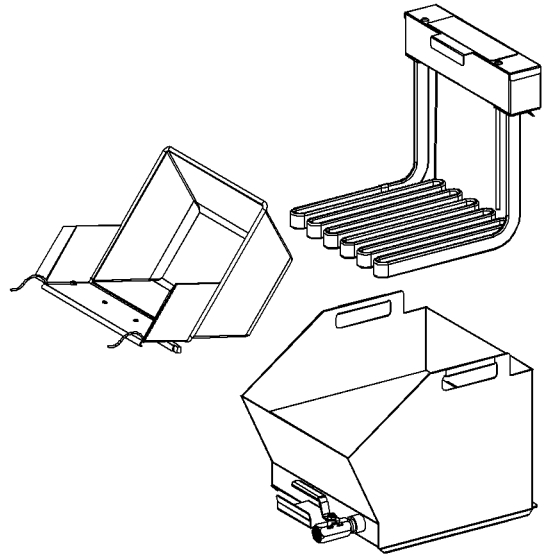

- 3) Remove grease filter tray from cabinet. Remove grease filter from tray and drain any oil that has accumulated. Wash both parts in soap and hot water. Rinse well in hot water and dry.

CLEANING (Continued)

4) Attach oil hose and drain cooking oil from vat into containers for disposal. Have empty containers handy for proper disposal of used cooking oil. A rendering company can help with proper disposal.

5) Remove basket lift, oil vat and heater module (picture right). Spray parts with oven cleaner, enclose with plastic bag for at least one hour or leave overnight if possible. Wash in soap and hot water and rinse well in hot water. Rinse parts in a solution of: 1 part white vinegar [5% acetic acid] and 2 parts water. **The vinegar rinse is very important.** It neutralizes soap residue that causes oil breakdown foaming. Soap residue turns oil dark and reduces its performance significantly. Clear water rinse parts. **Clean the male and female terminals on connectors with rubbing alcohol and cotton swab.**

CAUTION The heater box must **NOT** be immersed in water or other liquid.

CAUTION Do not spray male connector

6) Remove spill tray and drain any oil that has accumulated. Wash in soap and hot water. Rinse well in hot water and dry.

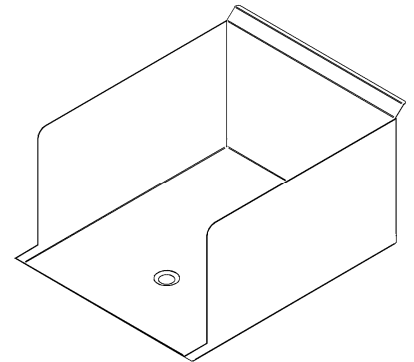

7) With internal components removed, clean cooking and filter compartments with grease cutting soap or oven cleaner if necessary. Rinse with damp cloth and dry.

CAUTION Do not spray female connector

8) Clean countertop and external surfaces.

9) Ensure that blow-off caps on fire extinguisher nozzles are kept in place

10) Re-install all parts (see ASSEMBLY page 11)

CLEANING (Continued)

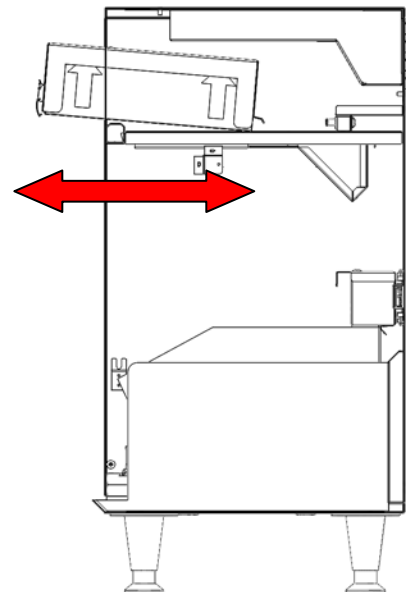

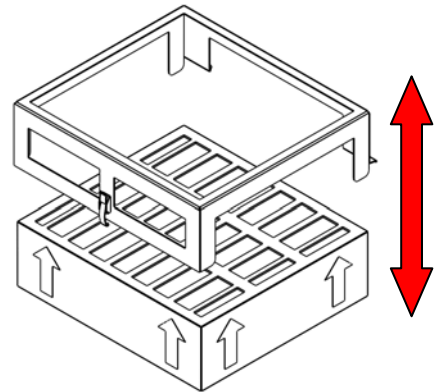

Periodic Maintenance

Air Filter Cartridge Replacement

- Replace the air filter cartridge at least once **every 2 months**, more often for higher volume usage. Replacement is safer and easier when the fryer is cool rather than hot.
- Only PERFECT FRY filters may be used in your RAPID FRYER.

Steps to replace air filter cartridge:

- 1) Open front panel by lifting and turning latches
- 2) Release latch on air filter cage, and remove air filter cage and air filter cartridge from filter compartment
- 3) Remove old used air filter cartridge from air filter cage
- 4) Wipe air filter cage clean
- 5) Fit air filter cage over new air filter cartridge and write date on cartridge
(↑↑ Arrows up)
- 6) Install air filter cage and new air filter cartridge firmly back into filter compartment and latch in place
- 7) Close front panel and latch shut

PFS Automatic Extinguisher

- The PFS automatic extinguisher must be inspected monthly by the owner/operator and semi-annually by authorized service personnel as per NFPA 17A. It is important that a maintenance program is set up with a local fire service company to ensure that local jurisdictional codes are being met. Please refer to PFS Automatic Extinguisher (page 45) for more information.

TIPS ON DEEP FRYING

Great Food in Less Time

- **Use premium quality commercial deep frying oil.** Canola and Soybean oils are recommended. Do not use household cooking oils from your local supermarket. Poor quality oils may shorten the life of the air filter cartridge.
- **Keep food frozen until ready to fry.** Frozen product will absorb less oil during the cooking process.
- **Remove ice from food.** Ice results in excess bubbling and spillage of oil out of the vat.
- **Minimize the moisture.** Excess moisture extends the cooking time. Water, ice, sugar and breading all contribute to shortening the life of the oil.
- **Try to reduce the amount of breading that falls off of the food.** Breading often has sugar and other ingredients that will reduce the oil's life and darken the appearance of food. Consider filtering the oil to remove the breading particles.
- **Do not overfill the drawer.** Excess food may not be cooked properly.

**MINIMIZE THE MOISTURE
REDUCE THE COOKING TIME
MAXIMIZE THE PROFIT**

Common Questions

- **How Much Oil to Use?**
The PERFECT FRY has a capacity of 2.75 gallons of oil (11L). Fill the oil vat to the cold line only.
- **How Much to Fry?**
Fill the drawer to the top only. The drawer has an approximate capacity of 3 lbs (1.5 kg) of product per cycle. Whatever you can fit in the drawer is what you can fry.
- **What is the Ideal Temperature Range for Cooking?**
The ideal temperature range for cooking product is between 350°F and 360°F (177°C and 182°C). The factory default setting for cooking temperature is 350°F (177°C).
- **Should Frozen Food Be Defrosted?**
DO NOT THAW FROZEN FOOD! Frozen foods only should be put directly into the fryer in order to minimize moisture.
- **Can I Refreeze Frozen Foods?**
NO, do not refreeze frozen foods. Foods that are refrozen can absorb more oil, which will result in a dry, brittle and tasteless product.

OIL FACTS

Frying oil is especially formulated to withstand high temperatures. For this reason, you must ensure you are using the right product. Liquid vegetable shortening is produced by several companies; the oil has an additive and/or has been formulated to increase the performance during high temperature usage.

DO NOT USE OIL THAT IS RECOMMENDED BOTH FOR SALAD AND FRYING!

Fill the oil vat to the cold line only. The oil expands as it heats and if overfilled, the bottom of the basket will remain in the oil when in the up/serve position.

How Much to Fry?

- Fill the drawer no higher than the top. Do not overfill the drawer.
- Keep drawer and basket clean and free of breading/batter build up.
- Remove ice crystals or excess water before frying.
- Do not salt or season before frying.
- Remove surplus and/or batter before frying.
- Do not allow frozen food to thaw before frying.
- Drain fried foods before serving.

How Hot is TOO Hot?

Ideal frying temperature range is between 350°F and 360°F (177°C and 182°C). Factory default setting is 350°F (177°C). When frying at too low a temperature, food absorbs more oil which increases oil consumption.

Excessive Oil Usage?

The fried product is absorbing oil. Possible reasons for this include:

- Excess breading or batter, shake off excess before frying.
- Allow basket to drain longer, adjust the drain time.
- Food is being allowed to thaw before frying.

Cleaning Your Fryer?

- Refer to the Cleaning section of this owner's manual. Remember to clean the basket and drawer daily.

Filtering Your Oil?

The most important procedure you can do is to maintain the oil, extending its life:

- Filter at least once a day, preferably first thing in the morning when the oil is at room temperature.
- Filtering removes all the contaminants from the previous days cooking.
- Clean the oil vat.

Points to Remember:

- Clean the cooking chamber at least once a week and rinse thoroughly.
- Filter oil daily.
- Do not overheat oil.
- Use the standby mode when possible.
- Do not salt product prior to frying.
- Remove ice crystals and moisture before frying.
- Maintain oil level in vat, check to ensure it is at the hot line often.
- The oil is dead when foaming appears continuously on the oil surface

Your oil, product taste, and customers depend on you.

OIL FACTS (Continued)

If the oil temperature is set too high, the food will cook on the exterior and the interior will be undercooked. When the interior is cooked completely, the exterior will be overdone or burnt. The higher temperature will also cause the oil to break down faster and smoke.

During slow periods, take advantage of the standby mode which allows the oil to cool down to 275°F (135°C), prolonging the oil life and reducing energy costs while allowing quick recover time when required.

The oil temperature should not be adjusted when cooking different products. Adjust the cooking time instead.

Frozen Foods

Put frozen foods directly into the fryer. **DO NOT THAW FROZEN FOODS!** Blot excess water from food before frying. Remove ice crystals that may be at the bottom of the product bag.

OIL AND WATER DO NOT MIX! Water reacts with oil and makes it break down rapidly resulting in darkening, smoking and foaming (a process called hydrolysis). Excess water in the oil can cause the following problems:

- Unnecessary temperature drop meaning longer cooking times.
- More energy usage to maintain cooking temperature.
- Excessive splattering inside the fryer resulting in a mess to clean up.
- Decreased life of the air filter and the oil.

Refreezing Frozen Foods?

Frozen foods should be fried frozen. Foods that are refrozen can absorb more oil and make your fried foods taste greasy. Refrozen food forms excessive ice and these ice crystals can bond food pieces together causing clumping. Remember:

- Always FRY FOOD FROZEN.
- NEVER REFREEZE thawed food.
- REMOVE ice crystals from product before frying.
- DO NOT accept thawed or refrozen product from supplier.

Excessive Foaming?

The main reason for foaming is improper rinsing of oil vat after cleaning:

- To remove soap residue, rinse 3 times with water after cleaning or neutralize with a water and vinegar solution (1 part white vinegar to 2 parts water).
- Take care of your oil; use standby mode during slow periods. High temperature and oxygen contribute to oil breakdown. Filter oil and clean vat at least once a day when using heavily breaded products.

Excessive Smoking/Oil Darkening?

- Oil is too hot, check temperature.
- Inadequate filtering, breading or batter build-up in vat causes oil breakdown, giving food a bitter taste.
- Moisture content is too high. Use precooked frozen products only. Remember to remove ice crystals.

Grease Soaked Food?

- Frozen food is being allowed to thaw before frying.
- Oil is in the advanced stages of breakdown, replace immediately.
- Oil temperature is too low, check temperature.
- Product has too much breading or batter, remove excess.

OIL FACTS (Continued)

Food Not Browning Properly?

- New oil may not brown the product; check color again after a few basket loads.
- Too much product is in the basket, fill no higher than the fill line.
- Product is not frying long enough, follow manufacturer's suggested cooking times.
- Oil temperature is too low, check oil temperature.
- Product is frying in excess foam.
- Oil level is too low, check the oil level.

Premature Oil Breakdown?

- Oil is at full temperature during slow periods, use standby mode.
- Oil is contaminated. Never use wire brushes, copper pads or steel wool for cleaning. Use a hard bristle brush and filter oil regularly. Rinse with water vinegar solution.
- Also, see section; **HOW HOT IS TOO HOT?**

Statement used in OIL FACTS section are taken from:

- NAFEM Food Service Industry
- Canola Research Foundation
- Sysco Oil Publication

OPERATING INSTRUCTIONS

OPERATING INSTRUCTIONS (Continued)

Starting Up

YOU DO THIS

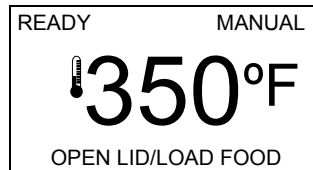

- 1) Press  for ½ second.
- 2) Allow 10 to 15 minutes for oil to reach operating temperature (350°F or 177°C).

LCD

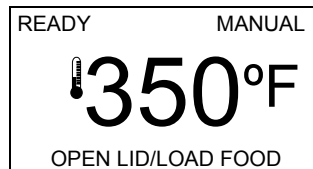

RAPID FRYER DOES THIS

- 1) Now in **HEATING** mode
- 2) Oil temperature rising to operating temperature
- 3) Once operating temperature is reached, now **READY** to start cooking.

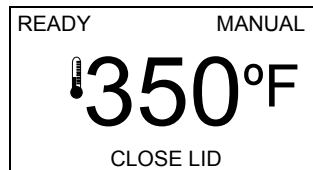

Manual Mode

- 1) Open drawer lid
- 2) Fill drawer with food product

- 1) LCD displays **OPEN LID/LOAD FOOD**

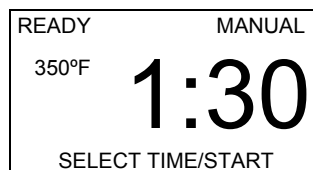

- 3) Close drawer lid

- 2) Basket lowers into oil
- 3) LCD displays **CLOSE LID**

- 4) Enter cook time and press 
e.g. 1 3 0 

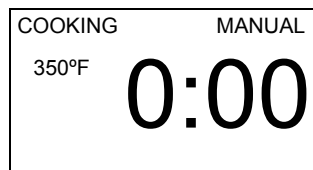

Note: DO NOT OPEN DRAWER LID OR FRONT PANEL WHEN PRODUCT IS LOADING

- 4) LCD displays **SELECT TIME/START**
- 5) Drawer loads food into oil
- 6) **COOKING** cycle begins
- 7) Fryer counts down time remaining
- 8) Basket raises out of oil
- 9) Food drains (time adjustable)
- 10) Fryer “beeps” to let you know that food is cooked
- 11) Fryer dumps food into warming tray

- 5) Serve food from warming tray

- 12) **COOKING** cycle is complete

OPERATING INSTRUCTIONS (Continued)

Preset Times

| Cooking Times & Names (factory defaults) | | | | | | | | |
|--|-----------------|------|--------|--------------|------|--------|-----------------|------|
| Preset | Name | Time | Preset | Name | Time | Preset | Name | Time |
| 1 | FRENCH FRIES | 3:00 | 4 | POPPERS | 3:00 | 7 | FISH FILLETS | 4:00 |
| 2 | CHICKEN TENDERS | 4:00 | 5 | CHEESE BITES | 2:00 | 8 | CHICKEN WINGS | 4:00 |
| 3 | ONION RINGS | 2:30 | 6 | CORN DOGS | 3:00 | 9 | CHICKEN & FRIES | 4:00 |

NOTE: Pressing **Preset** repetitively will toggle between **MANUAL** mode, **PRESET** mode **PRESET LOCKED** mode and **RAPIDFRY™** mode.

NOTE: The default presets are programmed and displayed to show you the **RAPID FRYER's** capabilities. We recommend that you change the presets to match your own requirements. Please refer to pages 40 and 41.

Preset Mode

YOU DO THIS

- 1) Open drawer lid
- 2) Fill drawer with food product
- 3) Close drawer lid
- 4) Press **Preset**

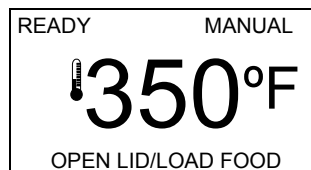

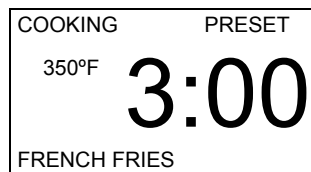

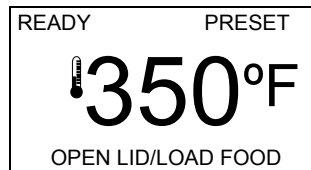

- 5) Press **1** (for example)
Cook cycle starts automatically

Note: You can choose between 9 different presets

Note: DO NOT OPEN DRAWER LID OR FRONT PANEL WHEN PRODUCT IS LOADING

- 6) Serve food from warming tray

LCD

RAPID FRYER DOES THIS

- 1) Now in **PRESET** mode
- 2) LCD displays **PRESET**
- 3) Basket lowers into oil
- 4) LCD displays **FRENCH FRIES** (default is 3:00)
- 5) Drawer loads food into oil
- 6) **COOKING** cycle begins
- 7) Fryer counts down time remaining
- 8) Basket raises out of oil
- 9) Food drains (time adjustable)
- 10) Fryer "beeps" to let you know that food is cooked
- 11) Fryer dumps food into warming tray
- 12) **COOKING** cycle is complete
- 13) Fryer returns to **READY** mode
- 14) Fryer returns to **MANUAL** mode

OPERATING INSTRUCTIONS (Continued)

Preset Locked Mode

YOU DO THIS

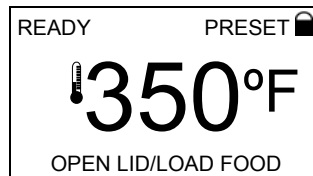

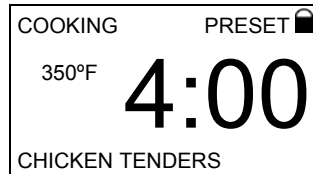

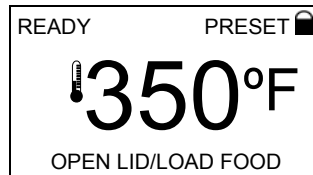

- 1) Open drawer lid
- 2) Fill drawer with food product
- 3) Close drawer lid
- 4) Press **Preset** + **Preset**
- 5) Press **2** (for example)
Cook cycle starts automatically

Note: You can choose between 9 different presets

Note: DO NOT OPEN DRAWER LID OR FRONT PANEL WHEN PRODUCT IS LOADING

- 6) Serve food from warming tray
- 7) Follow steps 1 through 3 and press desired preset number to cook another order this way

LCD

RAPID FRYER DOES THIS

- 1) Now in **PRESET LOCK** mode
- 2) **PRESET** with a lock icon is displayed on LCD
- 3) LCD displays **CHICKEN TENDERS** (default is 4:00)
- 4) Drawer loads food into oil
- 5) **COOKING** cycle begins.
- 6) Fryer counts down time remaining
- 7) **COOKING** cycle is complete
- 8) Basket raises out of oil
- 9) Food drains (time adjustable)
- 10) Fryer "beeps" to let you know that food is cooked
- 11) Fryer dumps food into warming tray
- 12) **COOKING** cycle is complete
Note: Still in **PRESET** with a lock icon mode

RapidFry™ Mode

- 1) Open drawer lid
- 2) Fill drawer with food product
- 3) Close drawer lid
- 4) Press **Preset** 3 times

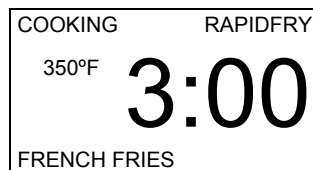

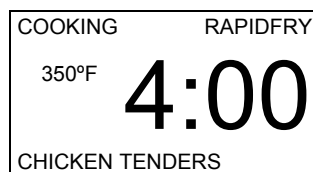

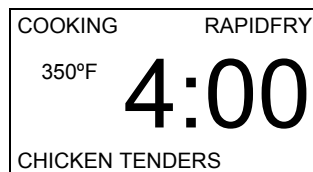

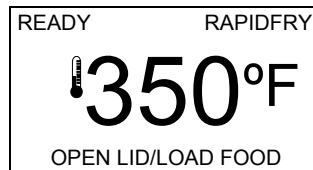

- 5) Press **2** (for example)
Cook cycle starts automatically

Note: You can choose between 9 different presets

Note: DO NOT OPEN DRAWER LID WHEN PRODUCT IS LOADING

- 6) Serve food from warming tray
 - 7) Follow steps 1 through 3
- Note: If you are using the same preset repetitively, there is no need to use the keypad. The movement of the drawer lid controls the cook cycle.

- 8) Press **Cancel** to change the preset used for **RAPIDFRY**
- 9) Press **1** (for example)

- 1) Now in **RAPIDFRY** mode
- 2) **RAPIDFRY** is displayed on LCD
- 3) LCD displays **CHICKEN TENDERS** (default is 4:00)
- 4) Drawer loads food into oil
- 5) **COOKING** cycle begins.
- 6) Fryer counts down time remaining
- 7) Basket raises out of oil
- 8) Food drains (time adjustable)
- 9) Fryer "beeps" to let you know that food is cooked
- 10) Fryer dumps food into warming tray
- 11) **COOKING** cycle is complete

Note: Still in **RAPIDFRY** mode and a new cook cycle time for existing preset. The existing preset remains until it is cancelled and changed.

OPERATING INSTRUCTIONS (Continued)

RapidFry™ 2GO

YOU DO THIS

- 1) Open drawer lid
- 2) Fill drawer with food product
- 3) Close drawer lid

- 4) Enter cook time and press **Start**
e.g. **1 3 0** **Start**

Note: DO NOT OPEN DRAWER LID OR FRONT PANEL WHEN PRODUCT IS LOADING

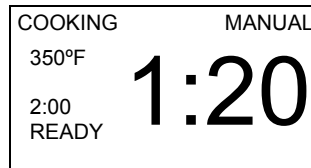

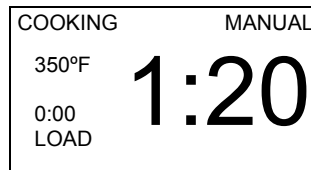

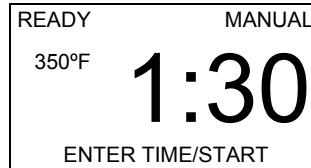

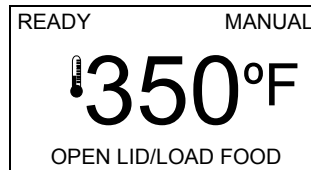

- 5) Open drawer lid after product is finished loading
- 6) Fill drawer with food product
- 7) Close drawer lid

- 8) Enter cook time and press **Start**
e.g. **2 0 0** **Start**

- 9) Serve food from warming tray

- 10) Follow steps 5 through 8 to preload another **COOKING** cycle

LCD

RAPID FRYER DOES THIS

- 1) Basket lowers into oil
- 2) Drawer loads food into oil
- 3) **COOKING** cycle begins
- 4) Fryer counts down time remaining
- 5) LCD displays time and status of preloaded **COOKING** cycle
- 6) Basket raises out of oil
- 7) Food drains (time adjustable)
- 8) Fryer “beeps” to let you know that food is cooked
- 9) Fryer dumps food into warming tray
- 10) Preloaded **COOKING** cycle begins automatically after original **COOKING** cycle is finished

RAPIDFRY™ 2GO works with all the different preset modes and behaves according to the mode. Example: for RAPIDFRY™ mode, simply opening and closing the drawer lid will display the time and status for a preloaded cooking cycle.

OPERATING INSTRUCTIONS (Continued)

Dual Load

YOU DO THIS

- 1) Open drawer lid
- 2) Fill drawer with first food product (e.g. chicken)
- 3) Close drawer lid
- 4) Press **Preset**
- 5) Press **9** (for example)
Cook cycle starts automatically

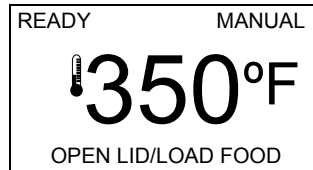

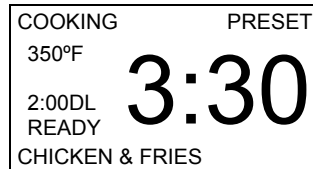

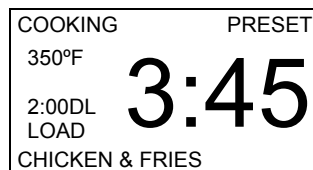

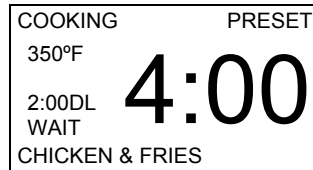

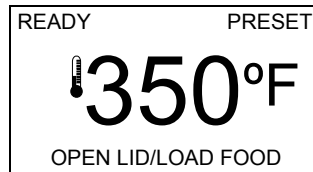

Note: Preset 9 has been programmed for dual load time (refer to page 40)

Note: DO NOT OPEN DRAWER LID OR FRONT PANEL WHEN PRODUCT IS LOADING

- 6) Open drawer lid
- 7) Fill drawer with second food product (e.g. fries)
- 8) Close drawer lid

- 9) Serve food from warming tray

LCD

RAPID FRYER DOES THIS

- 1) Basket lowers into oil
- 2) LCD displays **CHICKEN & FRIES** (default is 4:00 for chicken)
- 3) LCD displays 2:00DL and **WAIT** (default is 2:00 for fries)
- 4) Drawer loads chicken into oil
- 5) **COOKING** cycle begins.
- 6) Fryer counts down time remaining
- 7) LCD displays 2:00DL and **LOAD**
- 8) Fryer "beeps" every 10 seconds to remind you to load second product (e.g. fries).
- 9) LCD displays 2:00DL and **READY**
- 10) At 2:00 drawer loads fries into oil
- 11) Time and status of dual load disappears
- 12) Basket raises out of oil
- 13) Food drains (time adjustable)
- 14) Fryer "beeps" to let you know that food is cooked
- 15) Fryer dumps both food products into warming tray
- 16) **COOKING** cycle is complete

DUAL LOAD TIME works with all the preset modes (regular preset mode, preset locked mode and RAPIDFRY™ mode) and behaves according to the mode. To program a preset DUAL LOAD TIME, please refer to page 40. Example: for RAPIDFRY™ mode, simply opening and closing the drawer lid will display the time and status for a preloaded cooking cycle.

THE COMBINATION OF BOTH LOADS SHOULD NOT BE GREATER THAN A DRAWER FULL. ONE DRAWER FULL IS EXACTLY HOW MUCH THE BASKET CAN ACCEPT.

OPERATING INSTRUCTIONS (Continued)

Cooking Time Correction

YOU DO THIS

- 1) Enter incorrect cooking time
(4:30 instead of 3:30 for example)
- 2) Press **4 3 0** **Start**

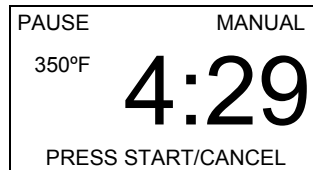

LCD

RAPID FRYER DOES THIS

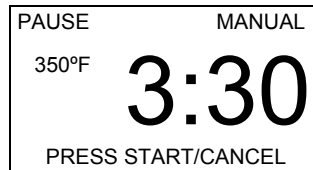

- 1) Drawer loads food into oil
- 2) **COOKING** cycle begins
- 3) Fryer counts down time remaining

- 3) Press **Cancel**

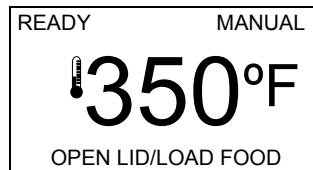

- 4) **COOKING** cycle **PAUSE**
- 5) Basket raises out of oil
- 6) LCD displays **PRESS START/CANCEL**

- 4) Press **3 3 0** **Start**

- 7) LCD displays new time
- 8) Basket lowers into oil
- 9) Fryer counts down new time remaining

Note: Pressing **Cancel** instead of entering a new time will complete the cook cycle and dump the food product into the warming tray

Open Drawer Lid – Paused Cook Cycle

- 1) Open drawer lid during product loading

- 1) **COOKING** cycle **PAUSE**
- 2) Basket raises out of oil

- 2) Close drawer lid to continue cooking cycle

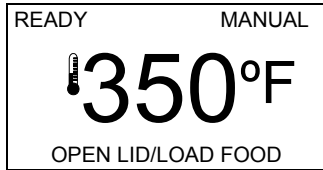

- 3) Brief pause, basket lowers into oil
- 4) Drawer completes loading product
- 5) **COOKING** cycle begins
- 6) Fryer counts down time remaining

DO NOT OPEN DRAWER LID OR FRONT PANEL WHEN PRODUCT IS LOADING

OPERATING INSTRUCTIONS (Continued)

Standby Mode

SEE THIS LCD

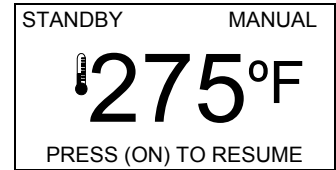

DO THIS

- 1) Press  and  together
- 2) Release both

Note: Temperature will decrease to 275°F (to set default standby temperature, see page 34 for more information)

GET THIS LCD

Note: During slow periods, using standby mode reduces energy costs, allows a quick recovery and minimizes oil breakdown.

Shutting Down

YOU DO THIS

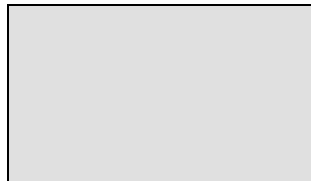

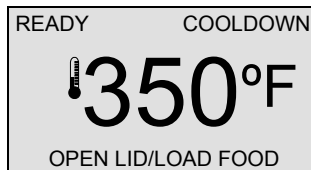

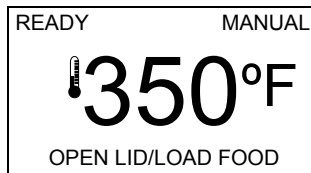

TURN YOUR PERFECT FRY OFF:

- At end of day
- To replace deep fry oil
- To clean
- For other service or maintenance

- 1) Press 

DO NOT UNPLUG FRYER
Fans must remain ON
during COOLDOWN mode

LCD

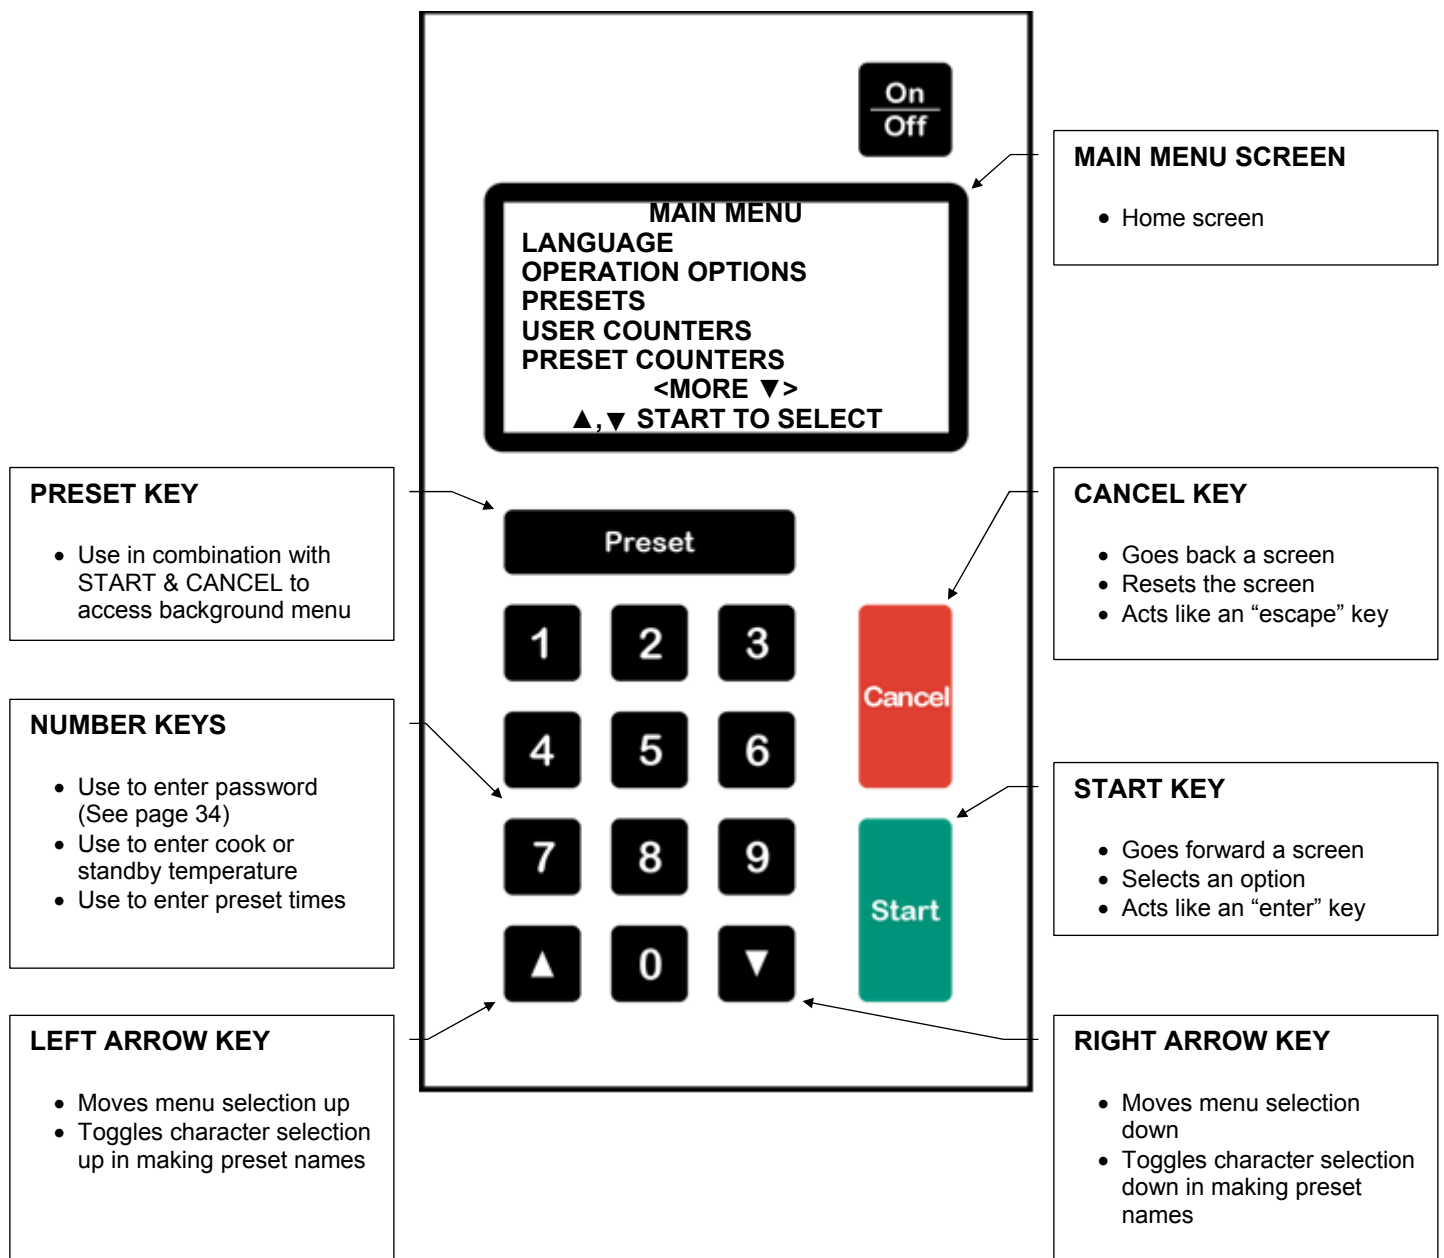

RAPID FRYER DOES THIS

- 1) Now in **READY** mode
- 2) Now in **COOLDOWN** mode
- 3) No power to heater element
- 4) Fans continue to cool fryer
- 5) Fryer counts down temperature
- 6) LCD backlighting goes off
- 7) Temperature decreases to 122 °F (50°C)
- 8) Fans stop
- 9) LCD goes blank
- 10) Your RAPID FRYER is off

|  | 3) Press 4 7 5 0 Start |  |
|  | 4) Scroll down to the desired menu selection and press Start |  |

CTS™ (Cook Time Sensitivity)

- CTS™ adjusts cooking time to compensate for the drop in cooking oil temperature when a basket of product is placed into the fryer. CTS™ increases cooking time to accommodate for differences in product moisture content, basket-load size, and initial temperature.
- A proper CTS™ setting will ensure a high quality product. For example; 2 lbs of French fries will cook to the same quality as only 6 ounces of French Fries.
- In addition to having a “global” CTS™ setting under the Operation Options menu for manually entered cook cycles, each preset can be programmed with its own individual setting. This provides for a lot of flexibility among different food products.
- Some experimenting with the range of 1 to 9 may be required to achieve optimum quality. A value of 5 is a good place to start and is the default.
- A setting of 0 means no CTS™ whatsoever.

USER DEFINED OPTIONS (Continued)

OPERATION OPTIONS

➤ WAIT MODE

- When ☒, will not allow cooking until oil has reached operating temperature
- Default is ☐

➤ STANDBY MODE

- When ☒, gives user ability to put fryer into standby mode
- This is an energy saving feature which holds oil temperature at desired standby temperature
- Default is ☒

➤ PRESET MODE

- When ☒, only PRESET LOCKED mode and RAPIDFRY™ mode are available
- This allows the operator to better control inventories as manual cook cycles are not permitted
- Default is ☐

➤ BUZZER VOLUME

- Intensity of “beep” for finish of cook cycle and system errors
- Choose between 0 and 9
- Default is 9

➤ KEY VOLUME

- Intensity of “beep” when a key is pressed
- Choose between 0 and 9
- Default is 4

➤ UNITS

- Temperature of oil in the vat
- Choose between °C (Celcius) and °F (Fahrenheit)

➤ DRAIN TIME

- Time a basket of cooked food sits out of the oil before finishing the cook cycle
- Choose between 0 and 30 seconds
- Default is 15 seconds

➤ COOK TEMPERATURE

- Operating temperature of the oil
- Choose between 275°F (135°C) and 375°F (190°C)
Note: Between 350°F and 360°F is ideal. If the temperature is set too low, the food will absorb too much oil and taste greasy. If the temperature is set too high, the food will cook too quickly on the outside and will be too dark once the inside is cooked. It may also cause the oil to breakdown quicker and cause smoking.
- Default is 350°F (177°C)

➤ STANDBY TEMPERATURE

- Oil temperature when fryer is in standby mode
- Choose between low (ambient room temperature) and high (cook temperature)
- Default is 275°F (135°C)

➤ LCD CONTRAST

- Visibility of screen
- Choose between 0 and 9

| OPERATION OPTIONS | |

USER DEFINED OPTIONS (Continued)

➤ CTS™ COOK TIME SENSITIVITY

- Adjusts cooking time to compensate for drop in cooking oil temperature when basket of product is placed into fryer. Refer to page 34 for more information.

| OPERATION OPTIONS | |
|----------------------|--------------------------|
| CTS | 5 |
| MELT CYCLE | <input type="checkbox"/> |
| HOLD TIME | 0M |
| FTS | 3 |
| MANUAL DRAWER | <input type="checkbox"/> |
| <MORE> | |
| ▲, ▼ START TO SELECT | |

➤ MELT CYCLE

- When ☒, fryer will gradually melt solid blocks of shortening until temperature reaches 212°F (100°C). It is designed to prevent scorching shortening and overheating element.
- Press  to cancel and heat regularly. DO NOT CANCEL IF USING SOLID SHORTENING!
- Default is ☐

➤ HOLD TIME

- Time elapsed after cook cycle is finished
- Allows operator to monitor time since product has finished cooking
- “Beeps” and flashes hold time elapsed on LCD
- Choose between 0 and 99 minutes
- Default is 0 (disabled)

➤ FTS™ FOOD TYPE SENSITIVITY

- Adjusts cook cycle loading and unloading sequences to compensate for differences among food products being cooked.
- In addition to having a “global” FTS™ setting under the Operation Options menu for manually entered cook cycles, each preset can be programmed with its own individual setting. This provides for a lot of flexibility among different food products.
- Some experimenting with the range of 1 (normal) to 9 (very battered) may be required to achieve optimum performance. For example, chicken tenders will work well under a setting of 1 since they don't tend to stick together. However, battered french fries will need to set to 5 as they tend to stick together when they're cooked.
- 3 is the default. Please refer to chart.

| Table 2 – FTS Values | | | |
|----------------------|----------------|-------------------|--------------|
| FTS Value | Basket Start | # of Shakes | # of Unloads |
| 1 | In Oil | 0 | 1 |
| 2 | In Oil | 0 | 2 |
| 3 | In Oil | 1 (15 seconds in) | 2 |
| 4 | In Oil | 1 (45 seconds in) | 2 |
| 5 | In Oil | 2 (15 & 45 in) | 3 |
| 6 | Drain position | 0 | 1 |
| 7 | Drain position | 0 | 2 |
| 8 | Drain position | 1 (15 seconds in) | 2 |
| 9 | Drain position | 1 (45 seconds in) | 2 |

➤ MANUAL DRAWER

- When ☒, will allow drawer to load during cook cycle simply by pressing 
- When ☒, will disable RAPIDFRY™ 2GO
- Default is ☐

Customizing Presets on the Front Label

Used in conjunction with your custom programmed presets (please refer to page 40), easily identify your own custom presets by using the supplied label page. Simply follow the steps below:

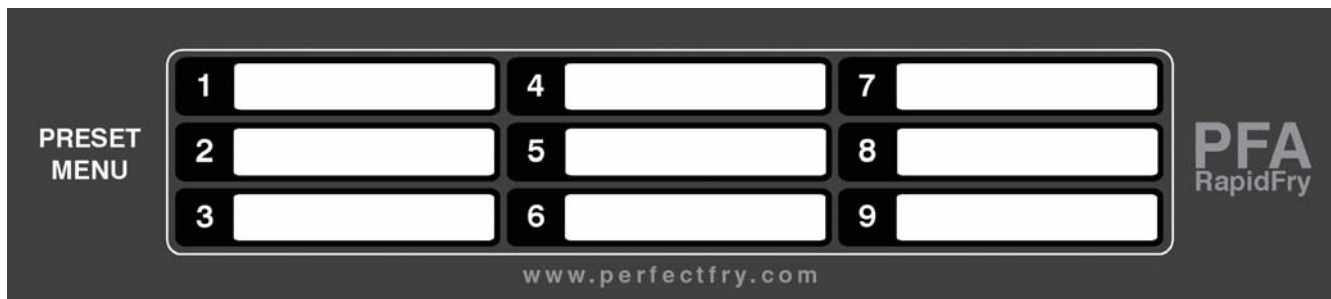

- 1) Remove preset slider (default presets are located on front and custom preset label template is located on back).
- 2) Choose preprinted labels or create your own label from supplied label sheet.
- 3) Apply labels to preset slider in proper preset box (up to 9 labels corresponding to 9 programmed presets may be used on preset slider).
- 4) Install preset slider under preset menu label by starting from bottom.

HELP

- Your RAPID FRYER “beeps” twice to signal an error condition. When the error condition is corrected, two beeps signal OK.
- It is possible to have more than one SYSTEM ERROR displayed at the same time. When that happens, all error conditions will be displayed on the LCD. All must be corrected.
- When a SYSTEM ERROR condition exists, the PERFECT FRY de-energizes the heating element, but the fans continue to run.
- When there appears to be a problem, but no SYSTEM ERROR message is displayed, refer to the trouble-shooting table on page 44. If the solution suggested doesn't solve the problem, call your service rep. or PERFECT FRY at 603-225-6684.

System Error Conditions

PFS AUTOMATIC EXTINGUISHER

Note: Please refer to the PFS Automatic Extinguisher Installation, Inspection, Maintenance & Recharge Manual (6PT677) for more detailed information.

The PFS must be stored above 0°C (32°F)

1. GENERAL DESCRIPTION

The PFS consists of a cylinder assembly (with pressure switch and gauge), actuating lever, fusible link assembly, manual pull station, and two nozzles. It is designed and acceptable for use in areas that have ambient conditions between 0°C (32°F) and 50°C (120°F).

2. OPERATION

Automatic Operation

Upon the detection of a fire, the PFS will automatically operate. The fusible link rated at 138°C (280°F) will operate when exposed to the fire and operate the PFS automatic extinguisher unit. When operated, the PFS unit will discharge wet chemical agent through the provided discharge piping and distribution nozzles.

Manual Operation

The PFS unit can also be operated manually by pulling the remote lever (to be mounted on the front of the cooking appliance) that is clearly marked “In Case Of Fire - PULL”.

IMPORTANT:

The manual pull handle is to be pulled **ONLY IN CASE OF FIRE** in the **PERFECT FRYER** (use when the automatic system has failed).

NOTE: Power shut-off is also achieved by system operation. If the pressure in the cylinder(s) drops below 92 psi, the pressure switch opens, deactivating the power relay causing the appliance to de-energize.

3. INSPECTION & MAINTENANCE

The PFS must be serviced on a regular basis. Three types of servicing are required:

Monthly

An inspection or “quick check” must be conducted by the owner/operator and include verification of the following:

- 1) The PFS is in its proper location.
- 2) The PFS shows no physical damage or condition that might prevent operation.
- 3) The pressure gauge is in the green operating range.
- 4) The maintenance tag is in place and is up to date.
- 5) The manual pull is unobstructed.
- 6) The nozzle blow-off caps are intact and undamaged.

Semi-Annually

The system must be inspected by authorized service personnel, as per NFPA 17A and include the following:

- 1) A check to see that the hazard has not changed.
- 2) Examination of the fusible link, cylinder, tubing, nozzles and all auxiliary equipment.
- 3) Fusible links must be replaced at least annually from the date of installation. They must be destroyed when removed. They need to be replaced with the proper rated link (6GT587). A fusible link loaded with grease or other material can result in an excessive delay in actuation.
- 4) Verification that the agent distribution piping is not obstructed. Remove the blow-off caps (6GT014) from the nozzles to ensure that they are free of grease build-up and inspect them for deterioration. Replace them as necessary.

PFS AUTOMATIC EXTINGUISHER (Continued)

Inspection and Maintenance

Semi-Annually (continued)

- 5) Where semi-annual maintenance of any wet chemical containers or PFS components reveals conditions such as, but not limited to, corrosion or pitting in excess of manufactured limits, structural damage or fire damage, repairs by soldering, welding, or brazing, the affected part(s) shall be replaced or hydrostatically tested. The hydrostatic testing of wet chemical containers shall follow the applicable procedures outlined in NFPA 17A.
- 6) All wet chemical systems must be tested for proper operation. A discharge of the wet chemical is normally not part of the test. Simply remove one lead from the pressure switch to initiate appliance shut-down.
- 7) Where the maintenance of the PFS reveals defective parts that could cause an impairment or failure of proper operation of the PFS, the affected parts must be replaced or repaired.
- 8) The maintenance report, with recommendations if any, shall be filed with the owner or with the designated party responsible for the PFS.
- 9) The PFS must have a tag or label indicating the month and year the maintenance is performed and identifying the person performing the service. Only the current tag or label must remain in place.

Twelve Years

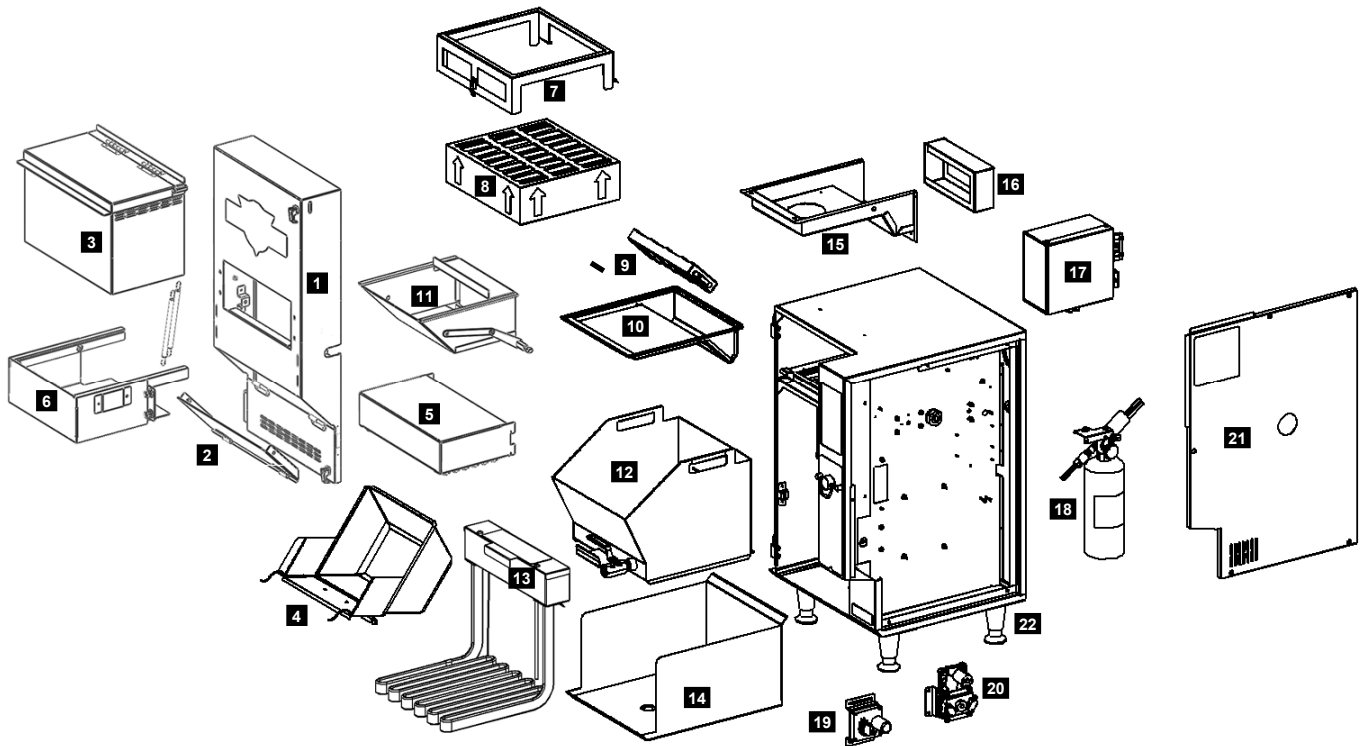

Maintenance must be done by authorized service personnel, as per NFPA 17A and include the following:

- 1) The wet chemical extinguishing agent must be removed and discarded.
- 2) The cylinder needs to be hydrostatically tested to 300 psi.
- 3) If the cylinder shows no signs of rupture or distortion, recharge the PFS as directed in the recharging instructions.

THE PERFECT FRY 1 2 3 WARRANTY

1 year **Labor**

During the first year after purchase, all labor required in repairing or replacing a defective part will be provided free of charge.

2 years **Parts**

During the first 2 years after purchase, all parts of the fryer which prove to be defective in materials or workmanship will be replaced free of charge (parts only).

3 years **Electronics**

During the first 3 years after purchase, if the electronics module proves to be defective in materials or workmanship, it will be replaced free of charge (parts only).

TERMS OF WARRANTY

- 1) Perfect Fry Company LLC warrants this fryer to be free from defects in materials and workmanship and will repair or replace it at Perfect Fry Company LLC's option for a period of two years after purchase providing the purchaser follows the manufacturer's recommended procedures for operation and maintenance contained in this manual. Perfect Fry Company LLC shall not be liable for injury or damage to property other than this fryer.
- 2) The warranty applies to materials at the factory for two years (3 years electronics) and labor for one year from date of purchase. The warranty does not include materials and labor employed in cleaning the fryer. Any and all transportation and shipping charges and expenses are the responsibility of the Purchaser. The warranty card must be completed and registered with Perfect Fry Company LLC within 30 days of purchase to validate the warranty. The warranty will cease to exist if maintenance has not been performed according to the manufacturer's instructions. This warranty does not cover damage arising from or caused by improper maintenance, directly or indirectly, transportation, accident, misuse, improper installation, fire, flood, or acts of God. Parts repaired or replaced under this warranty are warranted throughout the remainder of the original warranty period only. The warranty does not apply to parts and service supplied or obtained from other than Perfect Fry or its authorized distributors.
- 3) Other than the warranty expressed in clause 1) hereof, Perfect Fry Company LLC expressly disclaims all conditions and warranties, express or implied, including, without limitation, the implied warranties of merchantability and fitness for a particular purpose. Perfect Fry shall not be responsible for, nor does this warranty extend to, any consequential or incidental damages or expenses of any kind or nature, regardless of the cause thereof or any knowledge which Perfect Fry may have regarding the probability of the occurrence of such damages or expenses including, without limitation, injury to persons or property, loss of life, loss of use of the products, lost goodwill, loss of income, lost resale profits, work stoppage, impairment of other goods, breach of contract, negligence or such other actions as may be deemed or alleged to be the cause of a loss or damage.
