

Standard Features

- Water usage – 6.5 gallons per cycle
- 12 cycles per hour
- Fully automatic cycle - 260 seconds
- Incoming water pressure regulator
- Internally mounted electric booster heater
 - Capable of minimum 60°F temperature rise for required 180°F minimum sanitizing rinse temperature
- One (1) 9 KW Heating Element in a 9 1/2 gallon rinse tank
- Two (2) Rotating Wash Arms - 1 upper & 1 lower
- Stationary Rinse Nozzles - Top & Bottom
- 30 Gallon Wash Tank
- Electromechanical controls
 - Safety door switch
 - Temperature control thermostat and low water protection
- Construction - 12 & 14 gauge stainless steel
- Operational and cleanability features
 - High pressure, all stainless steel wash arms
 - 28 3/4" wide x 30 1/2" high door opening
 - Double filtration system
 - Externally mounted spray down hose with spray gun nozzle
 - Waterproof LED digital gauges
 - Three wash cycles
- Installation features
 - Stainless steel control panel - easily accessible
 - Adjustable bullet feet
 - Detergent/rinse additive signal connection fuse box

Power/Connections

Electrical Rating

Wash Pump Motor Horsepower			7.5

Short Form Specifications

Item No. _____

Unit shall be LVO/Jackson* PT-10 Pass Through door style hot water sanitizing pot & pan washer. Electrical characteristics to be ____ volts / 60 cycles / ____ phase operation with a 260 second automatic cycle using 78 gallons of 180° F. final rinse water per hour. Stainless steel construction to include hood, frame, wash tank, and adjustable feet. A 7.5 HP motor mounted to a pump with a impeller shall be mounted to the machine frame. As standard the unit shall include:

- Single point connections for all utilities
- Three Wash times cycle switch
- Side mounted control box with electro-mechanical
- Built-in water pressure regulator components.

Unit shall be NSF Certified and UL Listed.

*Units shall be manufactured by LVO Manufacturing Inc.
