# SICO® 1800 Single & Dual-Height Stage System

A single or dual-height mobile folding stage with carpet or hard tuff-deck surface.

#### Features, Advantages & Benefits

**Deck Construction** – Constructed with durable 5/8" thick plywood.

- Unitized Steel Frame Constructed with a rigid, onepiece arc-welded unitized steel frame for long-lasting strength and durability. Deck is securely anchored to frame with rivets for ultimate structural stability.
- Deck Edge A vinyl coated steel deck edge wraps around the perimeter of the stage for long-lasting wear and durability.
- Deck Surface Complement your deck surface with long wearing carpet, or a durable scratch-resistant black Tuffdeck.
- Hook & Loop Drapery Fasteners Continuous hook & loop fastener banding placed around the perimeter edges of decking allows for quick and easy attachment of skirting without any clips or pins.
- **Load Capacity** Design live load is a uniformly distributed 125 lbs. per square foot (610 kg. per square meter).

**Stage Legs** – Stage unit rests on 8 direct-to-floor load bearing legs that serve as points of contact to stabilize the stage in the open position. Stage unit is equipped with either fixed height, or dual height legs.

- Single-Height Legs Available in 8" (20cm), 16" (41cm), 24" (61cm), and 32" (81cm) fixed heights.
- Dual-Height Legs Telescoping legs allow for easy and convenient height adjustments. Equipped only on dualheight stages.
  - Height Adjustment Pins Allows for 8" (20cm) height increments.
    - 16" 24" (41cm 61cm)
    - 24" 32" (61cm 81cm)
    - 32" 40" (81cm 102cm)
  - Swing-Out Legs Legs fold out from beneath the deck for use when stage is set-up at the maximum height. U-shaped leg helps pivot stage into the open position. Equipped only on dual-height stages.
- Glides Non-marring glides protect floors.

**Unit-to-Unit Connectors** – Attach additional stage units together.

- Non-Tiered Riser Connector Permanently attached spring-loaded yellow connector holds additional stage units securely together when at the same heights. No additional tools required.
- Tiered Riser Connector Built-in black connectors secure additional stages together when units are at different heights. Stage decks slightly overlap in this set-up to eliminate the possibility of chair legs sliding through. No additional chair stop is required.

Compact Self-storing Mobile Unit – Stage deck and legs of unit fold up compactly for storage. Designed to be a self-contained mobile unit for efficient single-person set-up and easy storage, resulting in considerable savings in labor and time. No need for additional transport carts, or heavy-lifting and carrying of individual sections.

Over-Center Locking
Mechanism – When legs
are folded, the alignment
of pivot points create just
the right amount of tension
to securely hold frame in
folded position for storage
and transport.

- **Flexible Transport Lock** The cable at the top of the unit secures stage ends together in the transport position.
- Heavy-Duty Wheels Two fixed and two swiveling heavy duty 5" (13cm) non-marring rubber wheels protect floors, and are designed for long life.
  - No heavy sections to lift or carry. Eliminates the need for a cart.
  - Wheels lower down and make solid contact with floor when folded for mobility.
- Yellow Wheel Frame The painted yellow frame identifies the side of stage unit that contains the swiveling wheels.

**Serial Numbers** – Attached to frame for easy identification.

**Stage Accessories** – SICO<sup>®</sup> provides all necessary accessories to complete your professional stage setup. Refer to our literature containing our complete line of stage accessories.

**Warranty** – Protected by a **3-Year Warranty** against manufacturer's defects. **Lifetime Warranty** on welds.
